

## Percentage of Amount & Percentage Change

Please write clearly in block capitals

Forename:

Surname:

### Materials

For this paper you must have:

- mathematical instruments

You **can** use a calculator.

### Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

### Information

- The marks for questions are shown in brackets.
- You may ask for graph paper, tracing paper and more answer paper. These must be tagged securely to this answer book.

### Advice

- In all calculations, show clearly how you work out your answer.

**1** Find the percentages of the following:

**1(a)** 40% of 120

[1 mark]

Answer \_\_\_\_\_

**1(b)** 80% of 800

[1 mark]

Answer \_\_\_\_\_

**1(c)** 70% of 230

[1 mark]

Answer \_\_\_\_\_

**1(d)** 99% of 130

[1 mark]

Answer \_\_\_\_\_

**1(e)** 28% of 900

[1 mark]

Answer \_\_\_\_\_

Answer: \_\_\_\_\_ %

- 7 A speed boat travels from A to B for the first part of a journey and then B to C to complete a journey.  
For the entire journey, A to C, the boat travels at an average speed of 21 kmph.  
During the journey, from B to C, the boat only travels at a speed of 13 kmph.  
Calculate the percentage decrease in average speed between the first and second part of the journey, given that the distance off each part is equal.
