## WEDNESDAY, 7 JUNE 2023 - MORNING

## MATHEMATICS - Component 2

Calculator-Allowed Mathematics HIGHER TIER

2 hours 15 minutes

## ADDITIONAL MATERIALS

An additional formulae sheet.
A calculator will be required for this examination.
A ruler, protractor and a pair of compasses may be required.

## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.
Do not use gel pen or correction fluid.
You may use a pencil for graphs and diagrams only.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer all the questions in the spaces provided.
If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.
Unless stated, diagrams are not drawn to scale.
Scale drawing solutions will not be acceptable where you are asked to calculate.
The number of marks is given in brackets at the end of each question or part-question.
You are reminded of the need for good English and orderly, clear presentation in your answers.

## Formula list

Area and volume formulae
Where $r$ is the radius of the sphere or cone, $l$ is the slant height of a cone and $h$ is the perpendicular height of a cone:

$$
\begin{aligned}
& \text { Curved surface area of a cone }=\pi r l \\
& \text { Surface area of a sphere }=4 \pi r^{2} \\
& \text { Volume of a sphere }=\frac{4}{3} \pi r^{3} \\
& \text { Volume of a cone }=\frac{1}{3} \pi r^{2} h
\end{aligned}
$$

Kinematics formulae
Where $a$ is constant acceleration, $u$ is initial velocity, $v$ is final velocity, $s$ is displacement from the position when $t=0$ and $t$ is time taken:

$$
\begin{gathered}
v=u+a t \\
s=u t+\frac{1}{2} a t^{2} \\
v^{2}=u^{2}+2 a s
\end{gathered}
$$

| :--- | :--- |
| $\qquad$Use: <br> Pressure $=\frac{\text { Force }(\mathrm{N})}{\text { Area }\left(\mathrm{cm}^{2}\right)}$ |

The base of a filing cabinet is a rectangle. It measures 45 cm by 60 cm . The whole of the base is in contact with the horizontal ground.
(a) The empty filing cabinet exerts a force of 675 N on the ground.

What is the pressure exerted on the ground by the empty filing cabinet?
Give your answer in $\mathrm{N} / \mathrm{cm}^{2}$.
$\qquad$
$\qquad$
$\qquad$
(b) When the filing cabinet is full, the pressure it exerts on the ground is $0.75 \mathrm{~N} / \mathrm{cm}^{2}$.

What is the force that the full filing cabinet exerts on the ground? Give your answer in newtons (N).
2. The diagram shows information about the percentage of households in Eduvale that owned a desktop computer for the even-numbered years from 2006 to 2018.

(a) (i) Complete this statement.

The percentage of households that owned a desktop computer decreased the most between the even-numbered years and

"The graph shows that 70\% of people owned a desktop computer in 2009 because it passes through that point."

Is Jane correct?

$\square$
(b) The table shows information about the percentage of households in Eduvale that had an internet connection for the even-numbered years from 2006 to 2018.
(i) On the diagram on page 4, plot the information for internet connection.
(ii) In which even-numbered year was the difference in the percentage of households in Eduvale owning a desktop computer and the percentage of households having an internet connection the greatest?
(iii) Eduvale is a large town in a county.

Comment on how, in this county, the percentage of households owning a desktop computer and the percentage of households having an internet connection are likely to have changed in this time period.
3. Eric is carrying out a survey for a company that makes energy drinks, Pop and Whizz. He asks 200 randomly selected adults to complete his survey.
(a) Pop costs $£ 1$ per bottle.

As part of his survey, Eric wants to find out how much money each month adults spend on Pop.

In the box below, write a suitable question for his survey to collect this information. You must include response boxes.
(b) In another question, he asks the 200 adults how many bottles of Whizz they buy each month.
The table shows the results for the 200 adults.

|  |  | Number of bottles |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 0 | 1 to 4 | 5 to 10 | more than 10 |  |
| Age <br> (years) | 18 to 25 | 26 | 12 | 6 | 6 |  |
|  | 26 to 35 | 29 | 34 | 41 | 2 |  |
|  | older than 35 | 32 | 11 | 1 | 0 |  |

Find the probability that an adult chosen at random from these 200
(i) does not buy Whizz,
$\qquad$
$\qquad$
$\qquad$
(ii) is 26 to 35 years old and buys 5 or more bottles of Whizz each month.
$\qquad$
$\qquad$
4. (a) The diagram shows a circle inside a square of side 8.2 cm .

Examiner

Diagram not drawn to scale

The sides of the square are tangents to the circle.
Find the area of the shaded region.
You must show all your working.

$\qquad$
$\qquad$
(b) The diagram shows a parallelogram. It is the cross-section of a prism.

The length of the prism is 16 cm .
Find the volume of the prism.

## 5. (a) Solve $7 x-5=2 x+3$.

(b) Roza is buying bananas and apples.

She buys $x$ bananas which cost 30 pence each.
She buys 2 more apples than the number of bananas she buys.
Her apples cost 25 pence each.
She pays a total of $£ 5.45$.
Use an algebraic method to find the number of bananas Roza buys.
$\qquad$
(c) Factorise $x^{2}+5 x+4$.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
6. Heath has $£ 3000$ to invest for five years.

No extra money will be paid in or withdrawn during these five years.
He is going to choose one of these accounts.

(a) Which account gives Heath the greater percentage increase in his money at the end of 5 years and by how much is it greater?

Show how you decide. State any assumption that you make.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

Account .......................... gives the greater percentage increase by \%

Assumption $\qquad$
$\qquad$
$\qquad$
(b) Comment on the effect that your assumption in part (a) has had on your decision.
7. The diagram shows a small park with gates at $A, B, C$ and $D$.

The scale is 1 cm represents 10 m .

A new outdoor gym is to be built in the park.
This should be:

- at least 55 m from the gate at $A$
- nearer to the gate at $B$ than the gate at $C$.

Use a ruler and a pair of compasses to show accurately on the diagram the region of the park where the outdoor gym can be built. Indicate clearly the region that is your answer.

An aircraft is making its final approach ready to land.
The aircraft is:

- flying at $3^{\circ}$ to the horizontal,
- 2.5 km horizontally from the start of the runway, as shown on the diagram above.

Calculate the vertical height of the aircraft above the horizontal ground. You must show all your working.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
9. A factory makes loaves of bread which are wrapped in packaging.

Independently, for any loaf wrapped in packaging, chosen at random:

- The probability that there is a fault with the bread is 0.02 .
- The probability that there is a fault with the packaging is 0.01 .
(a) Complete the tree diagram to show this information.

(b) A loaf wrapped in packaging is chosen at random.
(i) Calculate the probability that neither the bread nor the packaging has a fault.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(ii) Calculate the probability that either the bread or the packaging has a fault but they do not both have a fault.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

10. In this question, all lengths are in metres.

The diagram shows Terry's garden.

Diagram not drawn to scale

The patio is a square and the lawn is a rectangle.
The area of the lawn is $172.8 \mathrm{~m}^{2}$.
Use an algebraic method to find the area of Terry's patio.

Area of Terry's patio =
$m^{2}$
11. Rearrange this formula to make $y$ the subject.

$$
a=7\left(x+y^{5}\right)+2
$$

12. The box plot summarises the heights, in cm , of a class of students.

Use the box plot to complete the table.

| Range | Median | Lower quartile | Upper quartile | Interquartile <br> range |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |

13. 

Enya's house is put up for sale at the start of April.
It does not sell, so at the start of May, the sale price of the house is reduced by $20 \%$. At the start of June, the sale price is reduced by $15 \%$ of the price at the start of May.
(a) Enya says,
"My house has been reduced in price by a total of $35 \%$."
Explain why Enya is incorrect.
(b) The house is then sold for $£ 306000$.

What was the original sale price of the house at the beginning of April?
14. The area of country $A$ is $1078000 \mathrm{~km}^{2}$, correct to 4 significant figures. The area of country $B$ is $249300 \mathrm{~km}^{2}$, correct to 4 significant figures. The two countries merge to form country C.
(a) Calculate the upper bound of the area of country C.
$\qquad$
$\qquad$
(b) The population density of a country is the number of people per $\mathrm{km}^{2}$.

Country $C$ has a population of 82000000 , correct to the nearest million.
Calculate the least possible value of the population density for country $C$. You must show all your working.
15. (a) Solve $x^{2}-36 \leqslant 0$.
[3]
...............................................................................................................................................................................
$\qquad$
$\qquad$
$\qquad$
(b) On the axes below, sketch the part of the graph $y=x^{2}-36$ that represents the solution to the inequality $x^{2}-36 \leqslant 0$.
Mark any intercepts with the $x$-axis on your sketch.

16.

Diagram not drawn to scale

The diagram shows a sector, $A B D$, of a circle with centre $D$ and a triangle, $B C D$. $A \widehat{D} C$ is a right angle.

Show that the area of $A B C D$ is $150 \mathrm{~m}^{2}$, correct to 3 significant figures.
17. The diagram shows the graphs of $y=x^{2}+\frac{1}{x}$ and $y=2 x+1$ for values of $x$ between -2 and 3 .

(a) Show that where the line and curve intersect, $x$ satisfies the equation

$$
x^{3}-2 x^{2}-x+1=0 .
$$

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b) Write down the solutions to the equation $x^{3}-2 x^{2}-x+1=0$. Give your answers correct to 1 decimal place.
18. (a) $f(x)=x^{3}$

Find $f^{-1}(x)$.
(b) $\quad g(x)=(5 x-1)^{3}$

Expand and simplify $g(x)$.
19. (a)

Calculate the length of $B C$.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b)

Calculate the length of $E F$.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
20. Sian has seven numbered cards as shown below.

She shuffles them and turns them face down. She then turns them over to make a 7 -digit number.
(a) How many different 7-digit numbers can Sian make?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b) How many of these 7 -digit numbers are multiples of 5 ?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(c) What proportion of these 7-digit numbers are not multiples of 5 ?
$\qquad$
$\qquad$
$\qquad$
21. An inverted cone is held in a stand.

The radius of the cone is 20 cm and the height of the cone is 50 cm .

Diagram not drawn to scale

Jake pours some water into this cone.
When he stops, the radius of the surface of the water is 6 cm . The surface of the water is parallel to the base of the cone.

Rhian then pours water into the cone until it is completely full. She pours the water at a rate of 1 litre per 10 seconds.

How many seconds does it take Rhian to fill the cone?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

22. (a) The first 5 terms of a sequence are shown below.

$$
\begin{array}{lllll}
5 & 8 & 11 & 14 & 17
\end{array}
$$

Complete the term-to-term rule for this sequence.

$$
\begin{gathered}
t_{1}=5 \\
t_{n+1}=t_{n} \cdots \begin{array}{l}
\square \\
n
\end{array}, n \geqslant 1
\end{gathered}
$$

(b) (i) Show that $x^{3}-2 x-5=0$ can be rearranged as $x=\sqrt{\frac{2 x+5}{x}}$.
(ii) Use the iterative formula $x_{n+1}=\sqrt{\frac{2 x_{n}+5}{x_{n}}}$ with $x_{1}=2$ to find a solution of $x^{3}-2 x-5=0$ correct to 1 decimal place. Write down all your values of $x_{n+1}$.
23. In this question, $x$ and $y$ are horizontal and vertical distances in metres. An engineer designs a tunnel.
He models the uniform cross-section of this tunnel using the graph shown in the diagram.

The tunnel is 50 metres long and will cost $£ 250$ per $\mathrm{m}^{3}$ to excavate.
Use the graph with four vertical strips of equal width to calculate an estimate of the cost of excavating this tunnel.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Cost of excavating the tunnel will be $£$
