GCSE ECONOMICS

Paper 2 How the Economy Works

Friday 26 May 2023

Morning

Time allowed: 1 hour 45 minutes

Materials

You will need no other materials. You may use a calculator.

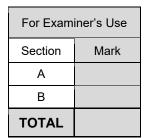

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
 - use good English
 organise information clearly
 - use specialist vocabulary where appropriate.

Answer all questions in the spaces provided. For questions with four responses, only one answer per question is allowed. For each question, completely fill in the circle alongside the appropriate answer. CORRECT METHOD WRONG METHODS IN (I)	Section A	
For each question, completely fill in the circle alongside the appropriate answer. CORRECT METHOD WRONG METHODS If you want to change your answer you must cross out your original answer as shown. 	Figure 2 – Inequality in the UK	Do n outs L
	Many people are concerned that inequality is increasing in the UK to unacceptably high levels. The share of income earned by the top 1% richest households has nearly tripled in the last forty years. Income inequality and wealth inequality can lead to social and economic problems. Solutions to rising income inequality include policies on taxation and welfare spending.	
	Wealth inequality comes from wide differences in people's wealth – often connected to rising prices of assets, such as houses. The problems caused by wealth inequality can be addressed by changes in taxation.	
5	Using Figure 2 , analyse how redistribution of income and wealth can be achieved through taxation and government spending. [6 marks]

IB/H/Jun23/8136/2

Table 5 shows the taxes collected by a government in 1 year.

Table 5

12

Tax revenues collected	£ billions
Income tax	225
Value-added tax	75
National Insurance contributions	150
All other taxes combined	150
Total tax revenue collected	600

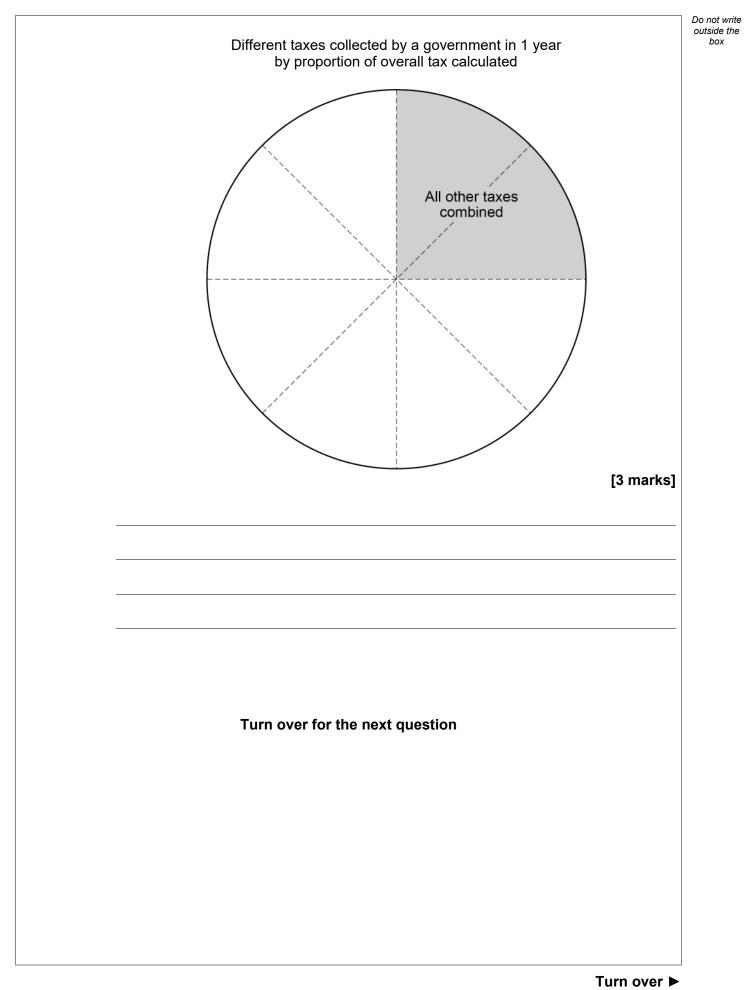

Use Table 5 to complete the pie chart on the opposite page to show the proportions of total tax revenue collected for each of the following taxes:

- income tax
- value-added tax •
- National Insurance contributions. •

Additional information:

- the area for 'All other taxes combined' has already been completed
- each segment shown on the pie chart represents 45 degrees
- use of a protractor is **not** required.

Section B

Answer **all** questions in the spaces provided.

Item A – Inflation in the UK

In 2022, UK inflation reached over 10% – its highest level for over 40 years. Inflation is measured by the change in the average level of prices, as measured by the Consumer Prices Index (CPI) and had been kept low for most of the last decade but has risen significantly since 2020. This is shown in **Table 6**.

CPI measured in April each year			
2018	105.4		
2019	107.6		
2020	108.5		
2021	110.1		
2022	120.0		

Table 6

Source: ONS

Inflation can create a number of problems for people, businesses and the economy. Problems created by high inflation include damaging international competitiveness – which has knock-on effects throughout the economy – and falling real incomes for many households.

Inflation can be reduced in a number of ways but this will depend on whether inflation is caused by demand-pull or cost-push factors. Interest rates are often used to control inflation as changes in interest rates can significantly affect the level of different types of spending in an economy. Interest rates also affect the exchange rate, which can sometimes help to control inflation.

Item B – Other economic problems facing the UK

It appeared there were other problems facing the UK economy as the country emerged from the end of the unusual period caused by the pandemic. Although economic growth was high in 2021 and was forecast to be high in 2022, it was forecast to be low afterwards. Some economists believe that tax rises planned during this period should be cancelled to help increase economic growth. Other problems facing the UK economy were the high level of government borrowing and the continuing deficit on the current account of the balance of payments.

Although inflation appears to be the biggest of all the problems, there were worries that attempts to control inflation would also lead to conflicts in achieving other government economic objectives. Interest rates have risen in 2022 and are expected to increase in the future. Interest rate increases can help achieve some objectives but often make it more difficult to achieve other objectives. Increased interest rates can be harmful for economic growth and jobs. As shown in **Figure 4**, economic growth is forecasted to be low in the next few years.

However, **Figure 4** also shows that the deficit on the current account, although high, is expected to fall in the next few years.
