TABLE 3

SUBROUTINE	PURPOSE
`getTile(row, column)`	**Returns the number of the tile on the board in the position** `(row, column)` **For example:** • `getTile(1, 0)` **will return the value** `5` **if it is used on the board in FIGURE 12, provided in the Diagram Booklet** • `getTile(1, 2)` **will return the value** `0` **if it is used on the board in FIGURE 12.**
`move(row, column)`	**Moves the tile in position** `(row, column)` **to the blank space, if the blank space is next to that tile.** **If the position** `(row, column)` **is not next to the blank space, no move will be made.**

	For example: • `move(0, 2)` **would change the board shown in FIGURE 12, provided in the Diagram Booklet, to the board shown in FIGURE 13, provided in the Diagram Booklet** • `move(2, 0)` **would not make a move if used on the board shown in FIGURE 12.**
`displayBoard()`	**Displays the board showing the current position of each tile.**

SUBROUTINE	PURPOSE
`getTile(row, column)`	**Returns the number of the tile on the board in the position** `(row, column)`

FIGURE 18

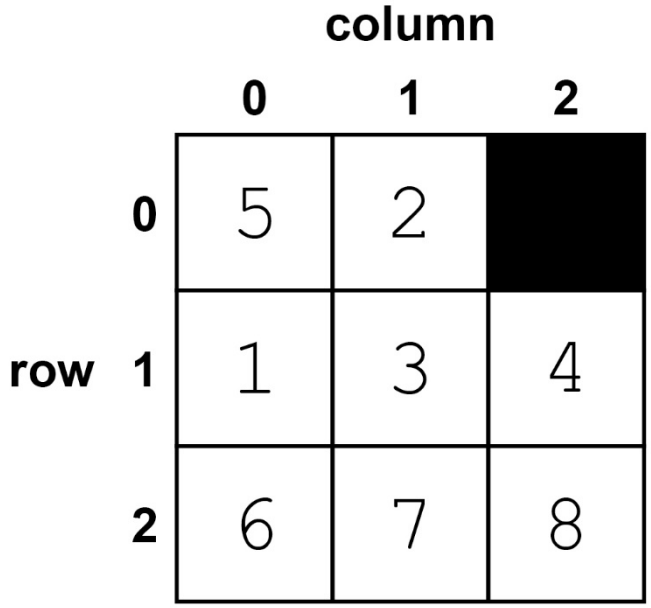

FIGURE 19

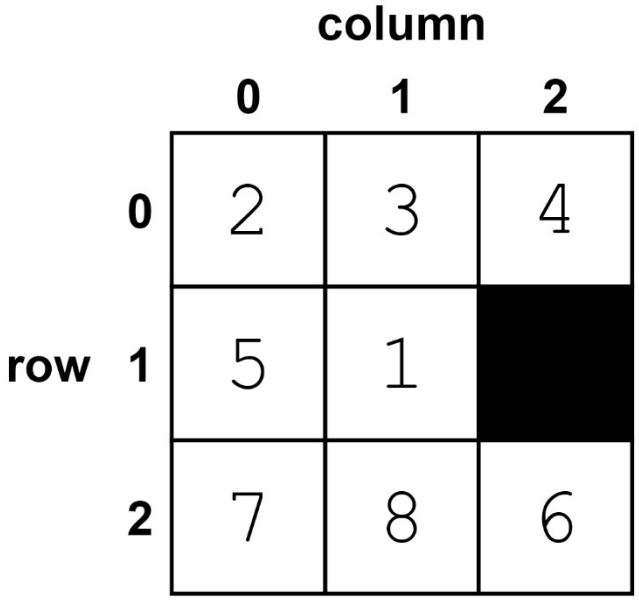


[Turn over]

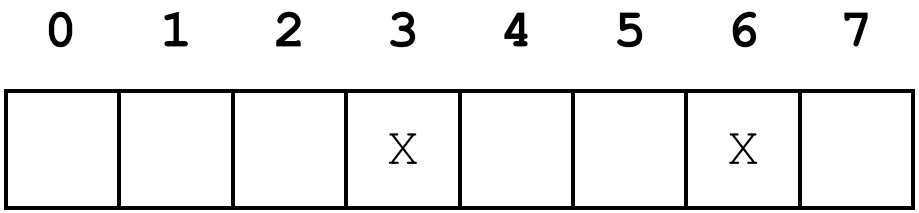
TABLE 5

SUBROUTINE	PURPOSE
`solved()`	**Returns** `True` **if the puzzle has been solved.** **Otherwise returns** `False`
`checkSpace(row, column)`	**Returns** `True` **if there is a blank space next to the tile on the board in the position** `(row, column)` **Otherwise returns** `False`

TABLE 6

SUBROUTINE	PURPOSE
`move(row, column)`	**Moves the tile in position** `(row, column)` **to the blank space, if the blank space is next to that tile.** **If the position** `(row, column)` **is not next to the blank space, no move will be made.**

FIGURE 20



[Turn over]

FIGURE 21

- **The player starts at position `0` in a row of cells.**
- **The aim of the game is for the player to reach the end of the row.**
- **At each turn the player must enter either `1` or `2`**
  - **if the player enters `1`, the player's position increases by 1**
  - **if the player enters `2`, the player's position increases by 2**
- **If the player's position goes beyond the end of the row or contains an `X`:**
  - **the message `Bad move` is displayed**
  - **the player goes back to position `0`**
- **These steps are repeated until the player reaches the end of the row.**
- **If the player reaches the end of the row the game is finished.**
