**Date – Morning/Afternoon**

**GCSE (9–1) Mathematics**

**J560/04** Paper 4 (Higher Tier)

**SAMPLE MARK SCHEME**

**Duration:** 1 hour 30 minutes

**MAXIMUM MARK 100**

**DRAFT**

**This document consists of 15 pages**

**Subject-Specific Marking Instructions**

1. **M** marks are for using a correct method and are not lost for purely numerical errors.  
**A** marks are for an accurate answer and depend on preceding **M** (method) marks. Therefore **M0 A1** cannot be awarded.  
**B** marks are independent of **M** (method) marks and are for a correct final answer, a partially correct answer, or a correct intermediate stage.  
**SC** marks are for special cases that are worthy of some credit.
2. Unless the answer and marks columns of the mark scheme specify **M** and **A** marks etc, or the mark scheme is 'banded', then if the correct answer is clearly given and is not from wrong working **full marks** should be awarded.

Do not award the marks if the answer was obtained from an incorrect method, ie incorrect working is seen and the correct answer clearly follows from it.

3. Where follow through (**FT**) is indicated in the mark scheme, marks can be awarded where the candidate's work follows correctly from a previous answer whether or not it was correct.

Figures or expressions that are being followed through are sometimes encompassed by single quotation marks after the word *their* for clarity, e.g. FT  $180 \times (\textit{their} '37' + 16)$ , or FT  $300 - \sqrt{(\textit{their} '5^2 + 7^2')}$ . Answers to part questions which are being followed through are indicated by e.g. FT  $3 \times \textit{their} (a)$ .

For questions with FT available you must ensure that you refer back to the relevant previous answer. You may find it easier to mark these questions candidate by candidate rather than question by question.

4. Where dependent (**dep**) marks are indicated in the mark scheme, you must check that the candidate has met all the criteria specified for the mark to be awarded.

5. The following abbreviations are commonly found in GCSE Mathematics mark schemes.

- **figs 237**, for example, means any answer with only these digits. You should ignore leading or trailing zeros and any decimal point e.g. 237000, 2.37, 2.370, 0.00237 would be acceptable but 23070 or 2374 would not.
- **isw** means **ignore subsequent working** after correct answer obtained and applies as a default.
- **nfww** means **not from wrong working**.
- **oe** means **or equivalent**.
- **rot** means **rounded or truncated**.
- **seen** means that you should award the mark if that number/expression is seen anywhere in the answer space, including the answer line, even if it is not in the method leading to the final answer.

- **soi** means **seen or implied**.

6. In questions with no final answer line, make no deductions for wrong work after an acceptable answer (ie **isw**) unless the mark scheme says otherwise, indicated by the instruction 'mark final answer'.

7. In questions with a final answer line following working space:

- (i) If the correct answer is seen in the body of working and the answer given on the answer line is a clear transcription error allow full marks unless the mark scheme says 'mark final answer'. Place the annotation ✓ next to the correct answer.
- (ii) If the correct answer is seen in the body of working but the answer line is blank, allow full marks. Place the annotation ✓ next to the correct answer.
- (iii) If the correct answer is seen in the body of working but a completely different answer is seen on the answer line, then accuracy marks for the answer are lost. Method marks could still be awarded. Use the M0, M1, M2 annotations as appropriate and place the annotation ✗ next to the wrong answer.

8. In questions with a final answer line:

- (i) If one answer is provided on the answer line, mark the method that leads to that answer.
- (ii) If more than one answer is provided on the answer line and there is a single method provided, award method marks only.
- (iii) If more than one answer is provided on the answer line and there is more than one method provided, award zero marks for the question unless the candidate has clearly indicated which method is to be marked.

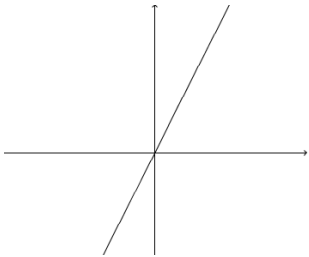

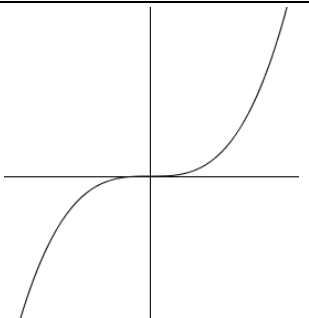

9. In questions with no final answer line:

- (i) If a single response is provided, mark as usual.
- (ii) If more than one response is provided, award zero marks for the question unless the candidate has clearly indicated which response is to be marked.

10. When the data of a question is consistently misread in such a way as not to alter the nature or difficulty of the question, please follow the candidate's work and allow follow through for **A** and **B** marks. Deduct 1 mark from any **A** or **B** marks earned and record this by using the MR annotation. **M** marks are not deducted for misreads.

11. Unless the question asks for an answer to a specific degree of accuracy, always mark at the greatest number of significant figures even if this is rounded or truncated on the answer line. For example, an answer in the mark scheme is 15.75, which is seen in the working. The candidate then rounds or truncates this to 15.8, 15 or 16 on the answer line. Allow full marks for the 15.75.
12. Ranges of answers given in the mark scheme are always inclusive.
13. For methods not provided for in the mark scheme give as far as possible equivalent marks for equivalent work. If in doubt, consult your Team Leader.
14. Anything in the mark scheme which is in square brackets [...] is not required for the mark to be earned, but if present it must be correct.

Question		Answer	Marks	Part marks and guidance	
1		23.6 – 23.8  Accept 24 provided full method shown	<b>3</b> 1 AO1.3b 2 AO3.1c	<b>M2</b> for $\frac{329 \times 130}{18 \times 100}$  Or <b>M1</b> for any two of $\frac{329}{100}$ or $\frac{130}{100}$ or $\frac{329}{18}$ or $329 \times 130$	May be done in stages
2	(a)	$4900\pi$	<b>2</b> 1 AO1.2 1 AO1.3a	<b>M1</b> for $\pi \times 70^2$ may be implied by 15393.8...	
	(b)	3.5	<b>2</b> 2 AO1.3a	<b>M1</b> for $\frac{17150\pi}{\text{their '4900}\pi\text{'}}$	<b>FT</b> from (a), provided (a) is a multiple of $\pi$
3	(a)	£20 000	<b>1</b> 1 AO1.3a		
	(b)	£14 580 or £14 600	<b>2</b> 2 AO1.3a	<b>M1</b> for $20\,000 \times 0.9^3$	
	(c)	7 years	<b>2</b> 1 AO1.3a 1 AO3.1c	<b>M1</b> for 2 trials shown	

Question			Answer	Marks	Part marks and guidance
4	(a)	(i)	Any straight line through the origin e.g. 	<b>2</b> 1 AO1.1 1 AO2.3b	<b>B1</b> for a straight line
		(ii)		<b>2</b> 1 AO1.1 1 AO2.3b	<b>B1</b> for a cubic with two turning points
	(b)	(i)	At least one point plotted correctly	<b>1</b> 1 AO2.3b	

Question		Answer	Marks	Part marks and guidance	
	(ii)		<p><b>3</b></p> <p>1 AO2.3b 1 AO3.1b 1 AO3.2</p>	<p><b>B2</b> for at least 5 points correctly plotted</p> <p>OR</p> <p><b>B1</b> for at least 3 points correctly plotted</p> <p>AND</p> <p><b>B1</b> for <u>curve</u> drawn through <i>their</i> points</p>	
<b>5</b>		25, 30, 17	<p><b>5</b></p> <p>2 AO1.3a 2 AO3.1d 1 AO3.3</p>	<p><b>M1</b> for any two consistent expressions, e.g. <math>x - 8</math>, <math>x</math></p> <p><b>M1</b> for <math>x - 8 + x + x + 5 = 72</math> <b>oe</b></p> <p><b>A1</b> for <math>x = 25</math></p> <p><b>B1</b> for Kieran 25 or Jermaine 30 or Chris 17</p>	Accept equivalent correct equations

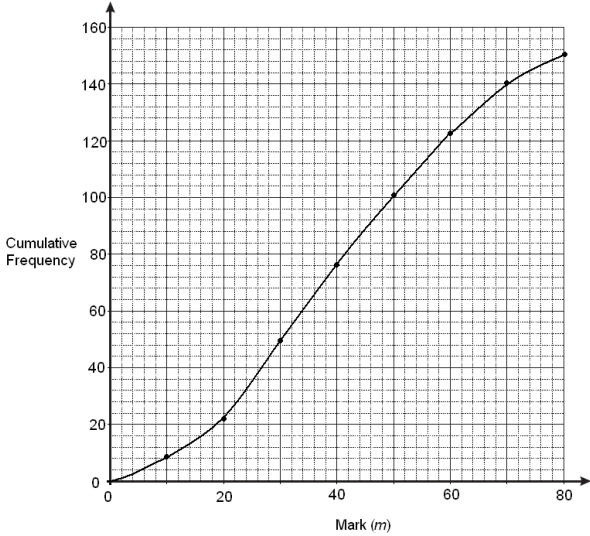

Question			Answer	Marks	Part marks and guidance
6			£25	<b>5</b> 2 AO1.3b 3 AO3.1d	<b>M1</b> for $10 \times \frac{2}{5} = 4$ litres red or $10 \times \frac{3}{5} = 6$ litres white <b>M1</b> for red costs £8 per litre or white costs £0.50 per litre <b>M1</b> for cost of one 10-litre can is <i>their '4' × their '8' + their '6' × their '0.5'</i> <b>M1</b> for $60 - \text{their '35'}$ Alternative method: <b>M1</b> for $2 : 3 = 20$ litres red : 30 litres white <b>M1</b> for $2 \times £80 + 3 \times £5 = £175$ <b>M1</b> for $\frac{\text{their '175'}}{5} = 35$ <b>M1</b> for $60 - \text{their '35'}$
7	(a)		50	<b>2</b> 2 AO1.3a	<b>B1</b> for $\frac{1}{6}$
	(b)	(i)	$\frac{2}{5}$ oe	<b>1</b> 1 AO2.1b	
		(ii)	$\frac{1}{5}$ oe	<b>1</b> 1 AO2.1b	
	(c)		No evidence that Dan knows what Ethan is thinking as over the 15 trials the relative frequency of $\frac{1}{5}$ is very close to the theoretical probability of $\frac{1}{6}$	<b>2</b> 1 AO2.5a 1 AO3.3	<b>M1</b> for reason not including reference to $\frac{1}{5}$ relative frequency or $\frac{1}{6}$ theoretical probability <b>FT</b> <i>their (a) and (b)</i>
8	(a)	(i)	-1	<b>2</b> 1 AO1.3a 1 AO3.1a	<b>M1</b> for use of $-5$ and $\div 2$ <b>soi</b> Or <b>M1</b> for answer 3

Question		Answer	Marks	Part marks and guidance	
	(ii)	-5	<b>3</b> 1 AO1.3a 2 AO3.1a	<b>M1</b> for $2x + 5$ <b>M1</b> for $x = \textit{their}$ '2x + 5' and solve	
	(b)	5, 10	<b>3</b> 1 AO1.3a 2 AO3.1a	<b>M1</b> for $3a + b = 5$ and $7a + b = 25$ <b>M1</b> for attempt to solve  Or <b>M1</b> input increases by 4; output increases by 20 <b>M1</b> so one box must have $\times 5$ for the arithmetic sequence	Condone $\frac{x^2 + 1}{2}$ across the two boxes for 3 marks
9	(a)	10 metres	<b>3</b> 1 AO1.3a 2 AO3.1c	<b>M1</b> for correct ratio $\frac{\text{height}}{20} = \frac{30}{60}$ <b>oe</b> <b>M1</b> rearrange Or <b>M1</b> for scale factor 0.5 <b>M1</b> for $20 \times 0.5$	
	(b)	2 valid reasons, e.g. She would have to be very far from the building. The estimate is likely to be inaccurate due to the scale factors at the distances involved.	<b>2</b> 2 AO3.4a		

Question		Answer	Marks	Part marks and guidance	
10		e.g. BD is common ABD = BDC (alternate angles) AB = CD (parallelogram) So triangles ABD and CBD are congruent by SAS	<b>3</b> 1 AO1.1 2 AO2.4b	<b>B2</b> for two facts with conclusion or <b>B2</b> for three facts with conclusion missing or unclear or <b>B1</b> for one correct fact	Each fact must be backed up with a reason
11	(a)	Any correct reason	<b>1</b> 1 AO2.4a		Exemplar responses: -1 and 1 both odd and either side of 0 Or can be divided by 2 exactly Or numbers that end in 0 are even Or zero remainder when divided by 2 Or next number in pattern of even numbers 8 6 4 2 Or added to an even number it gives even answer and added to odd number gives odd answer
	(b)	e.g. $a^2 + b^2 = c^2$ $a = 2x$ and $b = 2y$ implies $c^2 = 4x^2 + 4y^2$ So $c$ is even	<b>3</b> 1 AO2.1a 1 AO2.4b 1 AO3.2	<b>B1</b> for use of Pythagoras' theorem <b>M1</b> for even x even = even <b>soi</b>	

Question		Answer	Marks	Part marks and guidance	
12	(a)	$\sqrt{20} = \sqrt{4 \times 5}$ $= \sqrt{4} \times \sqrt{5}$ $= 2\sqrt{5}$	<p><b>2</b> 2 AO1.3a</p>	<p><b>M1</b> for <math>\sqrt{4} \times \sqrt{5}</math></p>	
	(b)	Either point which is 4 across and 2 up from A or 2 across and 4 up	<p><b>3</b> 1 AO2.3b 1 AO3.1a 1 AO3.2</p>	<p><b>B1</b> for <math>a^2 + b^2 = 20</math> <b>B1</b> for 4 and 16 (or 2 and 4) seen</p> <p>If zero scored <b>SC1</b> for correctly marking the position of <i>their a</i> and <i>b</i></p>	
13		11 or better	<p><b>4</b> 2 AO1.3b 1 AO3.1b 1 AO3.2</p>	<p><b>M1</b> for <math>r = \sqrt[3]{\frac{3V}{4\pi}}</math> <b>soi</b></p> <p><b>A1</b> for <math>r</math> (Earth) = 6365 km or <math>r</math> (Jupiter) = 69890 km</p> <p><b>M1</b> for <math>\frac{\textit{their}'69890'}<!--{\textit{their}'6365'}</math--></math></p>	
				<p>Alternate method: M1 for <math>\frac{1.43 \times 10^{15}}{1.08 \times 10^{12}}</math> A1 for 1324[.074...] M1 for <math>\sqrt[3]{1324}</math></p>	

Question			Answer	Marks	Part marks and guidance
14	(a)	(i)	Table: 9 23 49 76 101 123 140 150	2 2 AO1.3a	M1 for attempt to accumulate the values
		(ii)		4 1 AO1.3b 3 AO2.3b	B1 for labelling axes B1 for correct curve through points B1 for at least six points correctly plotted
	(b)		28 – 32	3 2 AO2.1b 1 AO2.3a	M1 for 45 or 105 seen A1 for corresponding answer  FT <i>their</i> graph
	(c)		The boundaries are set from approximations based on grouped data, not the actual scores obtained by the students	1 1 AO2.5b	
15			20 [decrease](%)	4 1 AO1.1 1 AO1.3b 2 AO3.1d	M1 for $pV = \text{constant}$ oe M1 for $p_{\text{initial}} V_{\text{initial}} = p_{\text{after}} V_{\text{after}}$ oe M1 for $1 \times 1 = p_{\text{after}} \times 1.25$ oe

Question		Answer	Marks	Part marks and guidance	
16	(a)	58° Subtended on same arc <b>oe</b>	<b>2</b> 1 AO2.1a 1 AO2.4b	<b>B1</b> for angle	
	(b)	68° e.g. angle DBC is 32° because the angle in a semicircle is a right angle <b>oe</b> so angle ACB is 68° because angles in a triangle sum to 180° <b>oe</b>	<b>3</b> 2 AO2.1a 1 AO2.4b	<b>B1</b> for using the angle in a semicircle is a right angle <b>B1</b> for using angles in a triangle sum to 180°	
17		Starter and main 8 × 12 Main and dessert 12 × 6 Three courses 8 × 12 × 6 96 + 72 + 576 = 744	<b>3</b> 1 AO1.3b 1 AO2.1a 1 AO2.2	<b>M1</b> for one correct product <b>M1</b> for summing <i>their</i> three products	
18		64.3 or $9\pi + 36$ <b>oe</b>	<b>4</b> 2 AO1.3b 2 AO3.1d	<b>M1</b> for $\frac{9\pi}{4}$ <b>soi</b> <b>A1</b> for $9\pi$ or 28.2[7...] <b>M1</b> for <i>their</i> ' $9\pi$ ' + 36	
19	(a)	1 <b>nfww</b> 10 <b>nfww</b>	<b>2</b> 1 AO1.2 1 AO1.3a	<b>B1</b> for each	<b>FT</b> <i>their</i> ' $u_2$ ' for $u_3$
	(b)	5 <b>nfww</b> 2 <b>nfww</b> 5 <b>nfww</b>	<b>3</b> 1 AO1.2 1 AO1.3a 1 AO2.1a	<b>B1</b> for each	<b>FT</b> <i>their</i> ' $u_2$ ' for $u_3$

Question		Answer	Marks	Part marks and guidance	
20	(a)	$\frac{n-m}{n(n+1)}$	2 2 AO1.3b	M1 for $\frac{n(m+1)-m(n+1)}{n(n+1)}$	
	(b)	$m < n \Rightarrow n - m > 0$ $\Rightarrow \frac{n-m}{n(n+1)} > 0$ $\Rightarrow \frac{m+1}{n+1} - \frac{m}{n} > 0$	2 2 AO2.4b	M1 for their ' $\frac{n-m}{n(n+1)}$ ' > 0
