

## Areas of Shapes

Please write clearly in block capitals

Forename:

Surname:

### Materials

For this paper you must have:

- mathematical instruments

You *can* use a calculator.

### Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

### Information

- The marks for questions are shown in brackets.
- You may ask for graph paper, tracing paper and more answer paper. These must be tagged securely to this answer book.

### Advice

- In all calculations, show clearly how you work out your answer.

- 1 The diagram shows a plan of some cardboard packaging.

Calculate the total area of the cardboard used.

2 The diagram shows the floor plan of a storeroom

The owner has ordered 14 items that each need at least  $200 \text{ cm}^2$  of floor space.

$$CD = 15 \text{ cm}$$

$$CA = 45 \text{ cm}$$

$$AB = 100 \text{ cm}$$

$$FE = 15 \text{ cm}$$

$$EB = 10 \text{ cm}$$

Is there enough room in the storeroom for all the items?

You **must** show your working.

- 4 A gardener is planning a new garden that is in the shape of a parallelogram. It features two ponds and a flower bed.

The rest of the space will be filled with grass.

The plan of the garden has been drawn to scale on a 1 cm grid labelled below.

1 cm = 5 m

Calculate the area that will be covered with grass.

Give your answer to 2 decimal places.

- 5 In the diagram the combined area of triangles  $ACB$  and  $FDE$  are equal to the area of the parallelogram  $BCDF$ .

$$\begin{aligned} CD &= x \\ DE &= x \\ FE &= 2 \text{ cm} \end{aligned}$$

Find the value of  $x$ .
