## Circle Graphs and Tangents

Please write clearly in block capitals

Forename:

Surname:

## Materials

For this paper you must have:

- mathematical instruments

You can use a calculator.

## Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- The marks for questions are shown in brackets.
- You may ask for graph paper, tracing paper and more answer paper. These must be tagged securely to this answer book.

## Advice

- In all calculations, show clearly how you work out your answer.

1(a) Which of the following equations represents a circle with a centre at $(0,0)$ and a radius of 8 ?

Circle your answer.

$$
\begin{array}{ll}
x^{2}+y^{2}=16 & (x+8)^{2}+y^{2}=0 \\
x^{2}+y^{2}=64 & x^{2}+(y+8)^{2}=0
\end{array}
$$

1(b) Which of the following equations represent a line that passes through the point $(0,7)$ and is tangent to a circle at point $(3,4)$ ?

Circle your answer.

$$
\begin{array}{ll}
y=\frac{3}{4} x+7 & y=-x+7 \\
y=7 x+\frac{3}{4} & y=7 x-1
\end{array}
$$

1(c) Describe the circle given the following equation: $x^{2}+y^{2}=25$
Circle your answer.

Centre $(0,0)$
Radius 50

Centre $(0,0)$
Radius 12.5

Centre $(0,0)$
Radius 10

Centre (0,0)
Radius 5

2 Consider the following circle with centre at $(0,0)$ which crosses the point, $(-4,0)$.

2(a) What is the diameter of the circle?
$\qquad$
$\qquad$
Answer $\qquad$

2(b) What is the equation of this circle?
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$
Turn over for next question

3(a) Determine the radius for the following circle: $x^{2}+y^{2}=32$.
Give your answer in surd form, as simplified as possible.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$

3(b) If the centre of the circle was moved 3 places to the left and 5 places up, what would the centre be?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$

4 Consider the following circle, with centre $(0,0)$
Point $P$ has the coordinates $(-3,-5)$

Work out the equation of the tangent, $A B$, to the circle at point $P$.
Give your answer in the form $a y=b x+d$ where $a, b$ and $d$ are integers.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$
$5 \quad$ Consider the following circle, with centre ( 0,0 ), and a radius of 5
Point $P$ has the coordinates $(-3,4)$

Work out the equation of the tangent, $A B$, to the circle at point $P$.
Give your answer in the form $a y=b x+d$, where $a, b$ and $d$ are integers.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$
$6 \quad$ Consider the following circle, with centre $(0,0)$, and a radius of 12
Point $Q$ has the coordinates $(5,13)$

Work out the equation of the tangent, $A B$, to the circle at point $Q$.
Give your answer in the form $a y=b x+d$, where $a, b$ and $d$ are integers.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Answer $\qquad$
