AS **ECONOMICS**

Paper 2 The national economy in a global context

Thursday 17 May 2018 Morning Time allowed: 1 hour 30 minutes

Materials

For this paper you must have:

- the insert
- a calculator.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in Section A.
- Answer either Context 1 or Context 2 in Section B.
- You will need to refer to the insert provided to answer Section B.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- There are 70 marks available on this paper.
- The marks for questions are shown in brackets.
- No deductions will be made for wrong answers.

	A a reduction in the current account deficit.	0	
	B a reduction in unemployment.	0	
	C an increase in the rate of economic growth.	0	
	D an increase in the rate of inflation.		1-7
		[1 mark	(]
0 5	Europe and North America enter a period of recovery from a recession remaining the same, the impact on the UK economy is most likely to		
	A an increase in structural unemployment.	0	
	B an increase in the current account deficit.	0	
	C a reduction in cyclical unemployment.	0	
	D a reduction in UK economic growth.	0	
		[1 mark	(]
0 6	Which one of the following best describes the action of the accelerate investment?	or theory of	
	A Firms decide to invest more following a cut in bank rate	0	
	B Firms invest in capital equipment due to higher economic growth	0	
	C Improved business confidence causes firms to increase their investment	0	
	D Large profits encourage firms to invest in new capital equipment	0	
		[1 mark	(]

7 The diagram below shows an economic cycle and the trend level of real GDP. Which point represents the economy producing at its normal capacity level of output?

[1 mark]

0 8 Which one of the following is the best definition of a household's total saving?

- A An injection into the circular flow of income
- **B** Contributions to a pension fund for retirement
- C Money placed in bank and building society accounts
- **D** That part of disposable income not spent on consumption

[1 mark]

Turn over for the next question

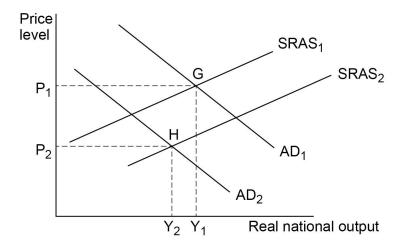

0 9	Inflationary pressures are normally low when an economy has a negative output gap.
	The most likely explanation for this is that

- A consumers' spending on imports and the exchange rate rise.
- **B** the Bank of England may cut bank rate and increase the money supply.
- **C** the government's tax revenue falls and spending on benefits increases.
- **D** unemployment is high and firms have excess capacity.

[1 mark]

In the diagram below, an economy is initially in equilibrium at point G. Aggregate demand then shifts from AD_1 to AD_2 and the short-run aggregate supply curve shifts from $SRAS_1$ to $SRAS_2$.

Which one of the following combinations of events will cause these shifts in AD and SRAS and move the economy to a new equilibrium at point H?

A A cut in income tax and an increase in VAT

0

B A fall in money wages and a fall in house prices

0

C An increase in productivity and a rise in consumer confidence

0

D Higher energy prices and lower government expenditure
