12. In this question, you will be assessed on the quality of your organisation, communication and accuracy in writing.

A rectangle is 7 cm long and 3 cm wide. Jo puts four of these rectangles on a table. They are joined together by the short sides of the rectangles to make one long rectangle.

What is the perimeter of the long rectangle that Jo has made?
You must draw a diagram of Jo's long rectangle and show all your working.

$$
[3+2 \text { OCD }]
$$

$\qquad$
These rectangles joined creates a long rectangle with the length of four rectangles but the width of just one

18. 80 cards are placed in a box.

Each card shows a picture of one of four islands near the coast of Wales: Bardsey Island, Ramsey Island, Skomer Island or Puffin Island.

A card is chosen at random from the box.
The table below gives some of the probabilities that the chosen card shows a picture of a particular island.

| Probability | 0.4 | 0.15 | 0.25 |  |

How many of the 80 cards show a picture of Puffin Island?
You must show all your working.
$\begin{aligned} \text { Probab: } 1 \text { ty of puffin. } \text { island } & =1-(0.4+0.15+0.25) \\ & =1-0.8=0.2 .\end{aligned}$
