Mark Scheme<br>(Results)

November 2021

Pearson Edexcel GCSE
In Combined Science (1SC0) Paper 2PF

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a <br> logical description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 | An answer that combines the <br> marking points to provide a <br> logical description, showing <br> application of knowledge and <br> understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification <br> (application of understanding) |  |
| AO3 | 1 a and <br> $1 b$ | An answer that combines points <br> of interpretation/evaluation to <br> provide a logical description |  |
| AO3 | 2a and <br> $2 b$ | Ab | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 3a | An answer that combines the <br> marking points to provide a <br> logical description of the <br> plan/method/experiment |  |
| AO3 | 3b |  | An explanation that combines <br> identifying an improvement of <br> the experimental procedure with <br> a linked justification/reasoning |

*there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 1 (a) | battery/cell symbol (1) lamp symbol (1) switch symbol (1) <br> then <br> complete series circuit shown (1) | ignore polarity of battery | $\begin{aligned} & \text { (4) } \\ & \text { AO3 } \end{aligned}$ |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | substitution (1) <br> $0.15 \times 40$ | (2) <br> evaluation (1) | AO2 <br> award full <br> marks for <br> correct <br> answer <br> without <br> working |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | $1.4(\mathrm{~A})$ | $\mathbf{( 1 )}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2a |  | three links correct (2) <br> one link correct (1) | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b ) \mathbf { i }}$ | circle shown around wire (1) | allow tolerance for <br> translation of 3D to 2D <br> ignore any multiplicity of <br> those circles | (1) <br> AO1 |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2 (b) ii | arrow indicating a clockwise <br> direction (for magnetic field line <br> drawn for i) (1) | (1) <br> AO1 |  |

| Question number | Answer |  | Additional guidance | Mark |
| :---: | :---: | :---: | :---: | :---: |
| 2(c) i |  | One mark for each point plotted correctly, to within $\pm 1$ small square |  | $\begin{aligned} & \hline(2) \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(c)ii | smooth curve drawn fitting the <br> plotted points (1) | judge by eye | (1) <br> AO2 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2ciii | substitution using an attempt at <br> calculation - any subtraction <br> seen (1) <br> e.g. 2(.0)-1(.0) <br> evaluation (1) <br> $(-) 1(.0)(\mathrm{mT})$ | (2) <br> AO3 |  |

| Question number | Answer | Mark |
| :--- | :--- | :--- |
| 2 (c) iv | (size of) current | (1) |
|  |  | AO1 |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) \mathbf { i }}$ | substitution (1) |  | (2) <br> AO2 |
|  | $\left(I=\frac{P}{V}\right)=\frac{1.9\left(\times 10^{3}\right.}{2} \mathrm{~L}(1)$ | $8.3 / 8.26$ (A) <br> evaluation (1) <br> award full marks for <br> correct answer <br> without working <br> award one mark for <br> $8.26 \times 10^{-3} / 0.0083$ |  |
|  | 8.3 (A) |  |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ~ ( a ) ~ i i ~}$ | choice and substitution (1) <br> $E=I \times V \times t$ <br> $=7.4 \times 230 \times 120$ |  | AO2 |
|  | evaluation (1) | accept 204000 / <br> 204240 |  |
|  | 200000 (J) | award full marks for <br> correct answer <br> without working |  |
|  |  | award 1 mark for <br> $3400 / 3404$ (J) <br> (using 2 minutes as <br> time) |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b ) \mathbf { i }}$ | Wire X ......earth........(1) |  |  |
|  | Wire Y .......live........(1) | accept 'life' | (2) |
|  |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3 (b) ii | Component Z ....fuse......(1) |  | (1) <br> AO1 |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 3 (c) | ```substitution (1) \(\left(I_{p}\right) \times 230=19 \times 2.37\) rearrangement (1) \((I p)=(19.0 \times 2.37) \div 230\) evaluation (1) input current \(=0.196(\mathrm{~A})\)``` | rearrangement and substitution in either order <br> allow numerical values written above equation <br> input voltage $=$ <br> (output voltage <br> $\times$ output current) <br> $\div$ input voltage <br> award full marks for any answer that rounds to $0.2(00)(\mathrm{A})$ <br> award 1 mark for 5.1(07) (substitution with upside down rearrangement) <br> award full marks for correct answer without working | $\begin{aligned} & \text { (3) } \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) i}$ | substitution(1) | (2) <br> AO2 |  |
|  | $(\triangle G P E)=72 \times 10 \times 7.0$ | do not penalise <br> any power of ten <br> error (p.o.t.e.) at <br> this stage <br> do not accept an <br> answer without <br> value for g (10) <br> being used) | evaluation (1) <br> $5040(\mathrm{~J})$ |
| (1) <br> award full marks <br> for correct answer <br> without working |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4aii | an explanation to include |  | (2) <br> AO3 |
| (potential / kinetic) energy is <br> transferred / dissipated (1) | accept lost / deceases <br> accept friction / air <br> resistance acts | accept to thermal <br> (store) | to surroundings / water / air / <br> slide (1) |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4b | Explanation linking tw o from: | (2) <br> choice of distance (1) <br> 6.3 m | (calculations of work done need) the <br> distance moved in the direction of the <br> force (1) |
| (friction acts) along the slope / <br> hypotenuse (1) | accept <br> pushed up <br> the slope |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(c) | substitution (1) | (3) |  |
|  | conversion (1) <br> uses $58 \times 10^{-3}$ or 0.058 | AO2 <br> evaluation (1) | do not penalise <br> p.o.t.e. at this stage |
|  | $23(\mathrm{~J})$ | award full marks for <br> any answer that <br> rounds to 23 (e.g. <br> $22.736)(\mathrm{J})$ |  |
|  |  | award max two <br> marks for any answer <br> that rounds to 2.3 to <br> any other power of <br> 10 |  |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{5 ( a )}$ | D variable resistor | (1) <br> AO1 <br> Options A, B and C are all wrong identifications with <br> both circuit components shown |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| 5(b) | C ammeter in series with component, voltmeter in <br> parallel <br> Only option C is correct for both the ammeter and the <br> voltmeter | (1) <br> AO1 |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 c ( i )}$ | A description including | as the potential difference <br> (voltage) increases so does the <br> current (1) <br> idea of gradient of graph <br> decreasing as V increases (1) | positive correlation <br> at a decreasing rate <br> non-linear <br> not directly <br> proportional |

| Question number | Answer |  |  | Additional guidance | Mark |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 5(c)(ii) | Award one mark for each row of the table |  |  | ignore any units added in the boxes | $\begin{aligned} & \text { (2) } \\ & \text { AO2 } \end{aligned}$ |
|  |  | voltage <br> V | current <br> in mA |  |  |
|  | point P | 1(.00) | 20 |  |  |
|  | point Q | $3.4 \pm 0.1$ | $43 \pm 1$ |  |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( c ) ( \text { iii) }}$ | substitution (1) |  | (2) |
|  | $(\mathrm{R}=) \frac{4.5}{51\left(\times 10^{-3}\right)}$ | 0.088(2) or 8.8(2) or <br> $0.88(2)$ or 0.09 <br> seen scores 1 mark | AO2 |
|  | evaluation (1) <br> $88 .(2)(\Omega)$ | 0.088(2) k $\Omega$ <br> or 0.09 k scores 2 <br> marks |  |
|  |  | award full marks for <br> correct answer <br> without working |  |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(c)(iv) | an explanation linking any three of: <br> identification of resistance <br> increasing (1) <br> heating (of the filament) (1) | (3) <br> AO1 <br> temperature <br> increases |  |
| because of more collisions (1) | of electrons (with ions / atoms / <br> other electrons) (1) |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6(a) | descriptions to include any two of <br> - particles / atoms in solid close(r) together (1) <br> - particles / atoms in solid (vibrate) in fixed positions but particles in liquid move (freely) (1) <br> - particles in a solid in regular arrangement but particles in liquid are randomly arranged (1) <br> - particles in a liquid have more (kinetic) energy (than in a solid) (1) | reverse argument <br> difference asked for, so must compare for subsequent marking points <br> allow answers in terms of forces between particles | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b )}$ | volume substitution (1) <br> $1.5 \times 1.0 \times 0.2(0)(=0.3)$ <br> substitution in equation (1) <br> mass $=2100 \times(0.3(0))$ | (3) <br> ecf from <br> calculated value of <br> volume for this <br> mark only |  |
|  |  | AO2 <br> evaluation (1) <br> $=630(\mathrm{~kg})$ | award 2 marks for <br> power of 10 |
|  |  | 5670 gains 1 <br> mark <br> from use of <br> $1.5+1.0+0.2=2.7$ |  |
|  |  | award full marks <br> for correct answer <br> without working |  |

| (properly) close window(s)/door |

| Question number | Indicative content | Mark |
| :---: | :---: | :---: |
| 6 (d)* | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> AO1 (strand 2) ( 6 marks) <br> Indicative content <br> - measure the length and width of a strip with the ruler / a metre rule <br> - measure the thickness of the strip with a more accurate device e.g. digital callipers OR place 5 (say) of the same strip on top of each other and measure their thickness with the ruler then $\div 5$ to calculate a single thickness [plus air gap] <br> - measure the mass of a strip with an electronic balance <br> - measure the mass of (say) 5 strips then $\div 5$ to calculate the mass of one of them <br> - calculate the volume (=I $\times \mathrm{w} \times \mathrm{t}$ ) in $\mathrm{m}^{3}$ and the mass in kg <br> - use displacement can/measuring cylinder to find the volume <br> - mass / volume to get density <br> - check if it's near one of the teacher's two values of density given <br> - if it's close / not so far off it's safe to assume that strip is of the identified material <br> - repeat for the other strip <br> - other repeat measurements | $\begin{aligned} & \text { (6) } \\ & \text { AO1 } \end{aligned}$ |

AO targeting: AO1. 2

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | - No rewardable material. |
| Level 1 | 1-2 | - Demonstrates elements of physics understanding, some of which is inaccurate. Understanding of scientific, enquiry, techniques and procedures lacks detail. (AO1) <br> - Presents a description which is not logically ordered and with significant gaps. (AO1) |
| Level 2 | 3-4 | - Demonstrates physics understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas, enquiry, techniques and procedures is not fully detailed and/or developed. (AO1) <br> - Presents a description of the procedure that has a structure which is mostly clear, coherent and logical with minor steps missing. (AO1) |
| Level 3 | 5-6 | - Demonstrates accurate and relevant physics understanding throughout. Understanding of the scientific ideas, enquiry, techniques and procedures is detailed and fully developed. (AO1) <br> - Presents a description that has a well-developed structure which is clear, coherent and logical. (AO1) |

Summary for guidance

| Level | Mark | Additional Guidance | General additional guidance - the decision within levels <br> e.g. - At each level, as well as content, the scientific coherency of what is stated will help place the answer at the top, or the bottom, of that level. |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material. |  |
| Level 1 | 1-2 | Additional guidance <br> Partially complete description of a suitable procedure with at least two measurements <br> OR <br> one measurement and another procedural point | Possible candidate responses <br> measure the length <br> measure the width of a strip <br> measure the mass/weight of a strip <br> e.g. <br> repeat measurements |
| Level 2 | 3-4 | Additional guidance <br> Mostly complete description of a suitable procedure with at least three measurements and some description of processing the results. | Possible candidate responses <br> As above with measure the thickness of the strip <br> calculate the volume (= $1 \times \mathrm{w} \times \mathrm{t}$ ) OR immerse in liquid to get volume |
| Level 3 | 5-6 | Additional guidance <br> Detailed description of a suitable procedure with all necessary measurements and a clear description of processing the results. | Possible candidate responses <br> As above with extra detail e.g. measure the mass of (say) 5 strips then $\div 5$ to calculate the mass of one of them detail of obtaining volume by immersion use density = mass /volume <br> check if density value obtained is near one of the teacher's two values |
