# Pearson Edexcel 

Mark Scheme (Results)

November 2021

Pearson Edexcel GCSE In Physics (1PH0) Paper 2H

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at:www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Mark schemes have been developed so that the rubrics of each mark scheme reflects the characteristics of the skills within the AO being targeted and the requirements of the command word. So for example the command word 'Explain' requires an identification of a point and then reasoning/justification of the point.
Explain questions can be asked across all AOs. The distinction comes whether the identification is via a judgment made to reach a conclusion, or, making a point through application of knowledge to reason/justify the point made through application of understanding. It is the combination and linkage of the marking points that is needed to gain full marks.
When marking questions with a 'describe' or 'explain' command word, the detailed marking guidance below should be consulted to ensure consistency of marking.

| Assessment <br> Objective |  | Command Word |  |
| :--- | :--- | :--- | :--- |
| Strand | Element | Describe | Explain |
| AO1* | An answer that combines the <br> marking points to provide a logical <br> description | An explanation that links <br> identification of a point with <br> reasoning/justification(s) as <br> required |  |
| AO2 | An answer that combines the <br> marking points to provide a logical <br> description, showing application of <br> knowledge and understanding | An explanation that links <br> identification of a point (by <br> applying knowledge) with <br> reasoning/justification (application <br> of understanding) |  |
| AO3 | 1a and <br> $1 b$ | An answer that combines points of <br> interpretation/evaluation to <br> provide a logical description |  |
| AO3 | 2a and <br> $2 b$ |  | An explanation that combines <br> identification via a judgment to <br> reach a conclusion via <br> justification/reasoning |
| AO3 | 3a | An answer that combines the <br> marking points to provide a logical <br> description of the <br> plan/method/experiment |  |
| AO3 | 3b |  | An explanation that combines <br> identifying an improvement of the <br> experimental procedure with a <br> linked justification/reasoning |

*there will be situations where an AO1 question will include elements of recall of knowledge directly from the specification (up to a maximum of $15 \%$ ). These will be identified by an asterisk in the mark scheme.

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ (a) (i) | use friction (1) | rub (the plastic rod) | (1) <br> AO1 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ (a) (ii) | C(1) <br> A and B are incorrect because <br> the cap would become charged <br> D is incorrect because the cap <br> would have an opposite charge <br> to that on the rod |  | AO |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ (b) | An explanation linking: | (2) <br> electrons move_(1) <br> movative charges <br> reject positive <br> electrons for this <br> mark | AO1 |
|  | with one from: <br> (leaf and/or rod) have been <br> discharged (1) <br> (gold leaf) is no longer repelled <br> (1) | to the earth |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ (c) (i) | (size of) charge on Q is greater <br> than (size of charge) on P (1) | in any order <br> Q has more charge / <br> stronger field than P | (2) <br>  <br>  <br> P has (overall) negative charge <br> and Q has (overall) positive <br> charge (1)accept abbreviations <br> such as +'ve, -'ve |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ (c)(ii) | (force of) attraction on (object) <br> P from (object) Q (1) |  | (1) <br> AO1 |

Total 7 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :---: | :--- | :--- | :--- |
| $\mathbf{8 c ( i ) ( F )}$ | A description including |  | (2) <br> $\mathbf{2 ( a i ) ( H )}$ |
| as the potential difference <br> (voltage) increases so does the <br> current (1) <br> idea of gradient of graph <br> decreasing as V increases (1) | positive correlation <br> at a decreasing rate <br> non-linear <br> not directly proportional |  |  |

| Question number | Answer |  |  | Additional guidance | Mark |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 8(c)(ii) ( F ) | Award one mark for each row of the table |  |  | ignore <br> any <br> units <br> added <br> in the <br> boxes | (2) |
| 2(aii) (H) |  | voltage in V | current in mA |  |  |
|  | point $P$ | 1(.00) | 20 |  |  |
|  | point Q | $3.4 \pm 0.1$ | $43 \pm 1$ |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { 8(c)(iii)(F) } \\ & 2(\text { aiii) (H) } \end{aligned}$ | substitution (1) $(\mathrm{R}=) \frac{4.5}{51\left(\times 10^{-3}\right)}$ <br> evaluation (1) 88.(2) ( $\Omega$ ) | 0.088(2) or 8.8(2) or $0.88(2)$ or 0.09 seen scores 1 mark <br> 0.088(2) k $\Omega$ or $0.09 \mathrm{k} \Omega$ scores 2 marks <br> award full marks for correct answer without working | $\begin{aligned} & \hline(2) \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( c ) ( \text { (iv)(F) }}$ | an explanation linking any three of: |  | (3) <br> AO1 |
|  | identification of resistance <br> increasing (1) <br> heating (of the filament) (1) <br> because of more collisions (1) | temperature <br> increases | of electrons (with ions / atoms / <br> other electrons)(1) |

Total 9 marks

| Question <br> number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9 ( a ) ( F )}$ | descriptions to include any tw o of |  | (2) <br> AO1 |
|  | particles / atoms in solid close(r) <br> together (1) | reverse <br> argument | difference <br> asked for so <br> must <br> compare for <br> subsequent <br> marking <br> points |
| particles / atoms in solid (vibrate) in <br> fixed positions but particles in liquid <br> move (freely) (1) | particles in a solid in regular arrangement <br> but particles in liquid are randomly <br> arranged (1) | particles in a liquid have more (kinetic) <br> energy (than in a solid) (1) | allow |
| answers in <br> terms of <br> forces <br> between <br> particles |  |  |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 9(b)(F) \\ & 3(b)(H) \end{aligned}$ | ```volume substitution (1) 1.5 < 1.0 x 0.2(0)(= 0.3) substitution in equation (1) mass = 2100 x (0.3(0)) evaluation (1) = 630 (kg)``` | ecf from calculated value of volume for this mark only <br> award 2 marks for 6.3 x any other power of 10 <br> 5670 gains 1 mark from use of $1.5+1.0+0.2=2.7$ <br> award full marks for correct answer without working | $\begin{aligned} & \text { (3) } \\ & \text { AO2 } \end{aligned}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 9(\mathrm{C})(\mathrm{F}) \\ & 3(\mathrm{C})(\mathrm{H}) \end{aligned}$ | statements to include any two from use cladding / (extra) insulation (1) use double thicknesses of the concrete (1) use silver / reflective / white (paint) (1) plant trees around (wind break) (1) use double glazed windows (1) (properly) close window(s)/door | create cavity <br> draft exclusion | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3 (d) | $269(\mathrm{~K})$ | allow use of 273.14? <br> $269.14(\mathrm{~K})$ | (1) <br> AO2 |

Total 8 marks

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{gathered} \hline 4(\mathrm{H}) \\ 10(\mathrm{~F}) \\ (\mathrm{ai}) \end{gathered}$ | $\begin{aligned} & \text { recall (1) } \\ & P=\frac{F}{A} \end{aligned}$ <br> substitution (1) $(\mathrm{p})=\frac{2400}{0.8}$ <br> evaluation $\begin{equation*} (P)=3000(\mathrm{~Pa}) \tag{1} \end{equation*}$ | may be implied by a correct substitution <br> award full marks for the correct answer without working | $\begin{aligned} & \text { (3) } \\ & \text { AO2 } \end{aligned}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{gathered} 4(\mathrm{H}) \\ 10(\mathrm{~F}) \\ (\mathrm{aii}) \end{gathered}$ | an explanation linking <br> greater pressure (on bottom of tank) (1) <br> with <br> greater force due to water (above bottom of tank) (1) | more weight of water more depth/height of water <br> ignore simply 'more water' or 'greater amount of water' | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 10 \text { aiii } \\ & (F) \end{aligned}$ |  |  | $\begin{aligned} & \hline 1 \text { (1) } \\ & \mathrm{AO}_{1} \end{aligned}$ |
| 4(aiii) (H) | an arrow perpendicular to the sloping side and pointing towards X | judge by eye |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 10 \mathrm{bi}(\mathrm{~F}) \\ & 4 \mathrm{bi}(\mathrm{H}) \end{aligned}$ | data points correctly identified $\begin{aligned} & (1) \\ & 50 \pm 2 \\ & 80 \pm 2 \end{aligned}$ <br> evaluation (1) $(-) 30 \pm 4 \mathrm{kPa}$ | award 1 mark if 80 and 50 seen ignore the lack of minus sign <br> allow ecf from incorrect reading of either pressure at 2000 m or pressure at 6000 m for one mark | $\begin{aligned} & \text { (2) } \\ & \text { AO3 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 0}$ (Fii <br> $\mathbf{4}$ bii (H) | any one suggestion of |  |  |
| greater density of atmosphere |  |  |  |
| (1) | accept reverse <br> argument <br> more particles (per <br> cubic metre) <br> the air gets thicker <br> greater depth of atmosphere <br> (above the aeroplane) (1) <br> greater temperature (of the <br> atmosphere) (1) | AO1) <br> greater weight of the <br> atmosphere |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & 10(c) \\ & (F) \\ & 4(c)(H) \end{aligned}$ | an explanation linking <br> the area (of contact between person and bed) is smaller when standing up (1) <br> same weight (over smaller area) so the pressure is greater when standing up (1) | accept reverse arguments <br> weight is more concentrated / not distributed/not spread across bed (when standing up) <br> uses $p=F / A$ argument (as a consequence of the smaller area, pressure is bigger) | $\begin{aligned} & \hline(2) \\ & \text { AO2 } \end{aligned}$ |

Total for question $4(h), \mathbf{1 0 ( F ) = 1 1}$ marks

| Question <br> number | Answer | Additional <br> guidance | Mark |  |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i )}$ | example: |  | (2) <br> AO3 |  |
|  |  |  | judge by eye <br> but do not <br> allow <br> rectangles in <br> contact |  |
|  |  |  |  |  |
| rectangles in (approximately) correct |  |  |  |  |
| position (1) |  |  |  |  |
| all four poles correctly labelled (1) |  |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i i )}$ | a description to include | (3) <br> place a (plotting) compass on <br> the paper (near to the <br> magnet(s)) and mark direction <br> of the field (at that point) (1) | place a (plotting) <br> compass on the <br> paper (near to the <br> magnet(s)) and put a <br> dot at each end of <br> the needle |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5 (b) (i) | substitution of values (1) <br> $1.2=\frac{K}{4(.0)^{2}}$ <br> rearrangement and evaluation <br> $(1)$ | allow rearrangment <br> before substitution <br> $(K=) 1.2 \times 4(.0)^{2}$ | (3) <br>  <br>  <br>  <br>  <br>  <br>  <br>  <br>  <br> unit (1) 19 |
| N cm ${ }^{2}$ | 19.2 <br> 0.00192 <br> award full marks for <br> the correct answer <br> without working <br> independent mark |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5}$ (b)(ii) | same magnitude and opposite <br> direction (1) | allow (now) attraction <br> for opposite direction | (1) <br> AO1 |

Question 5 total 9 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6}$ a | (sum of ) the clockwise <br> moments $=$ (sum of) the <br> anticlockwise moments | moment of magnet $=$ <br> moment of modelling <br> clay <br> moments are equal <br> (size) | $\mathbf{( 1 )}$ |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6 b | ```recall and substitution (1) (force x 12.0=) 0.050 x 8.4 rearrangement (1) (force = ) }\frac{0.050\times8.4}{12.0 evaluation (1) (force = ) 0.035 (N)``` | allow substitution and rearrangement in either order <br> award full marks for the correct answer without working. <br> if no other marks scored then award 1 mark for answers that round to 29 (eg 28.57) (substitution mark) | $\begin{aligned} & \text { (3) } \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ~ c}$ | a description to include four of <br> the following <br> measure the value of current <br> (1) <br> measure force or distance(1) <br> vary the current (1) | accept calculate for <br> measure | (4) <br> AO3 |
| restore equilibrium of system <br> (1) | increase weight or <br> move (existing) <br> weight to new <br> position <br> plot a graph of force / <br> distance against <br> current <br> graph would be a <br> straight line (through <br> the origin) |  |  |
| calculate ratio between force <br> and current or distance and <br> current (1) <br> if ratio is the same then they <br> are proportional (1) |  |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ~ d}$ | move the (position of) the <br> $(0.050 \mathrm{~N})$ weight (1) <br> to the other side of the <br> pivot/3.6 cm from the magnet <br> (1) | adjust mass of <br> modelling clay | (2) <br> AO3 <br> reduce (mass of <br> taking some away |

Total for question 6 = 10 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7}$ (a) (i) | D R and S | (1) <br> AO1 <br> because the difference in <br> vertical positions are all less <br> than that shown by R and S |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ~ ( a ) ( i i )}$ | recall (1) <br> work done = force x distance <br> substitution and evaluation (1) | (work done) = 700 x <br> 20 | (2) <br> AO1 |
| (work done = ) 14,000 (J) | award full marks for <br> the correct answer <br> without working |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( a ) ( \text { iii) }}$ | substitution (1) |  | (2) |
|  | $11250=\mathrm{m} \times 10 \times 15$ <br> rearrangement and evaluation <br> (1) |  |  |
|  | (mass=) $75(\mathrm{~kg})$ | AO2 <br> award full marks for <br> the correct answer <br> without working. |  |
|  |  | if no other marks <br> scored then award 1 <br> mark for answers of <br> 0.013 (substitution <br> mark using h = 15) |  |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 7 (a)(iv) | An explanation linking <br> some work is done to overcome friction/air resistance (1) <br> energy is dissipated /transferred to the environment (1) | allow energy is lost thermal energy | $\begin{aligned} & \text { (2) } \\ & \text { AO1 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( a ) ( v )}$ | C increase the efficiency of the <br> cyclist and bicycle | (1) <br> A is incorrect because <br> lubrication has no effect on <br> work done against gravity <br> B is incorrect because <br> lubrication will increase <br> efficiency <br> D is incorrect because the <br> overall energy transfer will not <br> increase |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{7 ( b )}$ | substitution (1)  <br> rearrangement (1)  <br> $\left(v^{2}=\right) \frac{2800 \times 2}{85}$ allow substitution and <br> rearrangement in <br> either order <br> evaluation (1)  | AO2 |  |
|  | $v=8.1(\mathrm{~m} / \mathrm{s})$ | 66 or 65.88 seen <br> allow values that <br> round to 8.1 e.g <br> 8.1168 <br> award full marks for <br> the correct answer <br> without working |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( i )}$ | voltmeter connected in parallel <br> with device (1) | voltmeter connected <br> in parallel with <br> battery <br> may be in top or <br> with device (1) <br> bottom of circuit and <br> could be inside or <br> outside the voltmeter <br> connections | (2) <br> AO1 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( \text { ii) }}$ | recall and substitution (1) <br> (power = ) 12 x 4.8 <br> evaluation (1) <br> (power = ) $58($ W) | voltmeter connected <br> in parallel with <br> battery <br> allow values that <br> round to 58 e.g. 57.6 | (2) <br> AO2 |

| Question number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \hline 8 \text { (a) } \\ & \text { (iii) } \end{aligned}$ | ```substitution (1) (power = ) 12 x 600(/1000) x 7 (x60) evaluation (1) (energy = ) 3000 (J)``` | allow values that round to 3000 e.g 3024 <br> allow 1 mark for any other values of 3(.024) to any power of ten. <br> if no other marks scored then award 1 mark for answers of 50,400 or 50.4 (substitution mark) <br> award full marks for the correct answer without working. | $\begin{aligned} & \text { (2) } \\ & \text { AO2 } \end{aligned}$ |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8 (b) (i) | 17.7 (A) |  | (1) <br> AO1 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8}$ (b) (ii) | (The resistance) increases |  | (1) <br> AO1 |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8 (b) <br> (iii) | B 5 A fuse | (1) <br> A is incorrect because it has a <br> smaller value than the <br> expected current <br> C and D are incorrect because <br> they have a much higher value <br> than the expected current |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( b ) ( i v )}$ | An explanation linking tw o of <br> thick(er) wires have low(er) <br> resistance (1) | allow reverse <br> argument | (2) <br> AO1 |
| less thermal energy transferred <br> (in the wires)(1) | allow so wires do not <br> get hot |  |  |
| less potential difference / <br> voltage (drop) across the wires <br> (1) | allow less voltage is <br> lost <br> more current can be <br> carried |  |  |

Total for question 8 = 11 marks

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9 a i}$ | D half the size of the voltage <br> across the primary coil |  | (1) <br> AO2 |
|  | A and B are incorrect because <br> the voltage will not necessarily <br> be twice or half the value of the <br> current | C is incorrect because the <br> voltage across secondary coil <br> will be less than that across the <br> primary coil |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{9}$ aii | an explanation linking three of <br> magnetic field in primary / <br> secondary coil / core (due to <br> current) (1) <br> magnetic field is alternating (1) <br> (this magnetic) field cuts/links <br> secondary coil <br> (1) <br> induces an alternating voltage | (3) <br> AO1 |  |
| (across secondary coil) (1) |  |  |  |$\quad$|  |
| :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9b | substitution into $\frac{V p}{V s}=\frac{N p}{N s}(1)$ | allow substitution and <br> rearrangement in <br> either order | (2) <br> AO2 |
|  | Rearrangement and evaluation <br> $(1)$ <br> $(N s=) \frac{600 \times 15}{N s}$ | accept values that <br> round to 39 <br> e.g. 39.13 <br> award full marks for <br> the correct answer <br> without working. |  |
| 39 | if no other marks <br> scored then award 1 <br> mark for answers of <br> that round to 0.026 <br> (eg 0.255) <br> (substitution mark) |  |  |

| Question number | Indicative content | Mark |
| :---: | :---: | :---: |
| *9(c) | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> - coil moving/cuts through magnetic field <br> - coil experiences changing magnetic field <br> - induces a voltage/current in the coil <br> - size of voltage/current depends on rate of change of magnetic field <br> - rate of change depends on angle between direction of movement and direction of field. <br> - greatest (rate of) change when coil moving perpendicular to field. <br> - maximum current at $Q$ and $S$ <br> - coil is horizontal at $Q$ and $S$ <br> - coil moving vertically up at $Q$ and down at $S$ <br> - direction of current at Q opposite to S. <br> - no change when coil moving parallel to field. <br> - zero current at $P, R$ and $T$ <br> - coil vertical at P, R, and T <br> Credit can be given for correctly labelled diagrams | (6) AO2 and AO3 |

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | - No awardable content |
| Level 1 | 1-2 | - Interpretation and evaluation of the information attempted but will be limited with a focus on mainly just one variable. Demonstrates limited synthesis of understanding. (AO3) <br> - The explanation attempts to link and apply knowledge and understanding of scientific ideas, flawed or simplistic connections made between elements in the context of the question. (AO2) |
| Level 2 | 3-4 | - Interpretation and evaluation of the information on both variables, synthesising mostly relevant understanding. (AO3) <br> - The explanation is mostly supported through linkage and application of knowledge and understanding of scientific ideas, some logical connections made between elements in the context of the question. (AO2) |
| Level 3 | 5-6 | - Interpretation and evaluation of the information, demonstrating throughout the skills of synthesising relevant understanding. <br> (AO3) <br> - The explanation is supported throughout by linkage and application of knowledge and understanding of scientific ideas, logical connections made between elements in the context of the question. (AO2) |

| 10aii | substitution into $\begin{align*} & \Delta \mathrm{Q}=\mathrm{m} \times \mathrm{L} \\ & 450,000=(1.41-1.21) \times \mathrm{L} \tag{1} \end{align*}$ <br> rearrangment $\begin{equation*} L=\frac{450,000}{0.2} \tag{1} \end{equation*}$ <br> evaluation $\begin{equation*} (\mathrm{L})=2200000(\mathrm{~J} / \mathrm{kg}) \tag{1} \end{equation*}$ | allow substitution and rearrangement in either order <br> accept 2250000 <br> award full marks for the correct answer without working <br> award 1 mark for answers that round to 330,000 or 370,000 (incorrect mass used) | $\begin{aligned} & \hline \text { (3) } \\ & \text { AO2 } \end{aligned}$ |

| Question number | Indicative content | Mark |
| :---: | :---: | :---: |
| * 10(b) | Answers will be credited according to candidate's deployment of knowledge and understanding of the material in relation to the qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates are not required to include all the material which is indicated as relevant. Additional content included in the response must be scientific and relevant. <br> Procedure <br> - Measure the temperature of the boiling water <br> - Allow sufficient time for block to reach temperature of boiling water <br> - Measure temperature of cold water in beaker <br> - Using a thermometer <br> - Transfer (hot) aluminium block to cold water in the beaker. <br> - Work quickly to avoid thermal energy loss during transfer <br> - Measure temperature of water <br> - Stir to ensure even distribution <br> - Measure maximum temperature reached by water <br> - Calculate temp rise of water by subtracting initial from final temperature. <br> - Calculate temp drop of aluminium by subtracting final temperature from 100. <br> - Find mass of beaker and water and aluminium <br> - Use a balance <br> - Empty water from beaker and dry beaker and block <br> - Weigh beaker and block alone <br> - Find mass of water by subtraction. <br> - Allow plausible method of finding mass of water before putting block in. <br> Process results <br> - Calculate thermal energy gained water using $\Delta \mathrm{Q}=\mathrm{m} \times \mathrm{c} \times \Delta \theta$ <br> - Thermal energy gained by water = thermal energy lost by aluminium <br> - Specific heat capacity of aluminium $=$ $\frac{\text { thermal energy transferred }}{\text { mass of } \mathrm{Al} \times \text { temp drop of } \mathrm{Al}}$ | $\begin{aligned} & \text { (6) } \\ & \text { AO2 and } \\ & \text { AO3 } \end{aligned}$ |

| Level | Mark | Descriptor |
| :---: | :---: | :---: |
|  | 0 | - No awardable content |
| Level 1 | 1-2 | - The plan attempts to link and apply knowledge and understanding of scientific enquiry, techniques and procedures, flawed or simplistic connections made between elements in the context of the question. (AO2) <br> - Analyses the scientific information but understanding and connections are flawed. An incomplete plan that provides limited synthesis of understanding. (AO3) |
| Level 2 | 3-4 | - The plan is mostly supported through linkage and application of knowledge and understanding of scientific enquiry, techniques and procedures, some logical connections made between elements in the context of the question. (AO2) <br> - Analyses the scientific information and provides some logical connections between scientific enquiry, techniques and procedures. A partially completed plan that synthesises mostly relevant understanding, but not entirely coherently. (AO3) |
| Level 3 | 5-6 | - The plan is supported throughout by linkage and application of knowledge and understanding of scientific enquiry, techniques and procedures, logical connections made between elements in the context of the question. (AO2) <br> - Analyses the scientific information and provide logical connections between scientific concepts throughout. A welldeveloped plan that synthesises relevant understanding coherently. (AO3) |

Summary for guidance

| Level | Mark | Additional Guidance | General additional guidance - the decision within levels <br> e.g. - At each level, as well as content, the scientific coherency of what is stated will help place the answer at the top, or the bottom, of that level. |
| :---: | :---: | :---: | :---: |
|  | 0 | No rewardable material. |  |
| Level 1 | 1-2 | Additional guidance <br> Partially complete description of a suitable procedure with at least one measurement | Possible candidate responses <br> Heat up the block in the boiling water. Then put the block into the cold water. Measure the temperature reached by the water. |
| Level 2 | 3-4 | Additional guidance <br> Mostly complete description of a suitable procedure with at least two measurements and some description of processing the results. | Possible candidate responses <br> As above with Measure mass of water. Use $\Delta Q=m \times c \times \Delta \theta$ to find thermal energy transferred |
| Level 3 | 5-6 | Additional guidance <br> Detailed description of a suitable procedure with most of the necessary measurements and a clear description of processing the results. | Possible candidate responses <br> As above with Calculate temperature changes by subtraction. <br> Calculate thermal energy lost by Al as being equal to thermal energy gained by water. <br> Specific heat capacity of $\mathrm{Al}=$ thermal energy transferred $\overline{\text { mass of } \mathrm{Al} \times \text { temp drop of } \mathrm{Al}}$ |
