## TUESDAY, 2 NOVEMBER 2021 - MORNING

## MATHEMATICS - NUMERACY <br> UNIT 1: NON-CALCULATOR <br> INTERMEDIATE TIER

1 hour 35 minutes

## ADDITIONAL MATERIALS

The use of a calculator is not permitted in this examination. A ruler, a protractor and a pair of compasses may be required.

## INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.
You may use a pencil for graphs and diagrams only.
Write your name, centre number and candidate number in the spaces at the top of this page.
Answer all the questions in the spaces provided.
If you run out of space, use the additional page at the back of the booklet. Question numbers must be given for the work written on the additional page.
Take $\pi$ as $3 \cdot 14$.

## INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.
Unless stated, diagrams are not drawn to scale.
Scale drawing solutions will not be acceptable where you are asked to calculate.
The number of marks is given in brackets at the end of each question or part-question.
In question 3(a), the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

## Formula List - Intermediate Tier

Area of trapezium $=\frac{1}{2}(a+b) h$

Volume of prism $=$ area of cross-section $\times$ length

1. Dean went to the gym yesterday afternoon.

The graph shows the distance Dean was from home during yesterday afternoon.
Distance from home (km)

(a) How far away from home was Dean at 15:15?

Circle your answer.
$15.5 \mathrm{~km} \quad 15 \mathrm{~km} \quad 16.5 \mathrm{~km} \quad 16 \mathrm{~km} \quad 17 \mathrm{~km}$
(b) At what time did Dean arrive back home?

Circle your answer.
5:30 p.m.
5:30 a.m.
5:15 p.m.
5:10 p.m.
5:00 a.m.
(c) Circle the term below that best completes the statement.
"Looking at the travel graph, it is $\qquad$ that Dean stopped for more than ten minutes on the way to the gym."
very unlikely unlikely impossible

$$
\text { an even chance } \quad \text { very likely }
$$

2. A water tank is filled every morning.

The graph below shows the depth of water in the tank between 8:00 a.m. and 9:00 a.m. on Friday and Saturday.

## Depth of water (mm)

(a) What was the difference between the depth of water on Friday and on Saturday at 8:20 a.m.?

You must give a reason for your answer.
(c) Consider the time interval between 8:10 a.m. and 8:50 a.m.

At what time was the depth of the water in the tank the same on both Friday and Saturday?
(d) On which day did the water tank fill more quickly between 8:30 a.m. and 8:40 a.m.?

You must give a reason for your answer.
(e) The tank can hold water to a depth of 400 mm .

On Saturday, at what time was the water in the tank half this depth?
8:28 a.m.
8:20 a.m.
8:35 a.m.
8:12 a.m.
8:30 a.m.
3. (a) In this part of the question, you will be assessed on the quality of your organisation, communication and accuracy in writing.

The following advertisement appeared in the Draig Newsletter.

## Mr Chen's guitar lessons.

A single lesson costs $£ 23$.

Pay in advance for 5 lessons and get $15 \%$ off the cost of these 5 lessons.

Rowena has a guitar lesson with Mr Chen.
She then decides to pay in advance for a further 5 lessons.
How much does Rowena pay in total for these 6 guitar lessons?
(b) Dafydd wants to learn to play the saxophone.

Saxophone lessons will cost him a total of $£ 300$.
He needs to pay a deposit of $£ 18$ to book the lessons.
What percentage of the total cost of the lessons is the deposit?

Examiner
4. Use this section of a map of Wales to answer this question. The map is drawn to scale.

(a) Complete each of the following statements.
(i) 'The bearing of Llanbister from Rhayader is .............................'
(ii) 'The bearing of Bleddfa from Llanbister is ...............................'.
(b) Cwmbelan is 2 miles from Llanidloes.

Sioned travelled from Rhayader to Crossgates in 30 minutes.
Calculate her approximate average speed.
Give your answer in miles per hour (mph).
You must show all your working.

## PLEASE DO NOT WRITE ON THIS PAGE

5. Three different stores sell bananas.

| Store | Price of bananas |
| :---: | :---: |
| FruitCo | 12 bananas for $£ 1$ |
| Quick Fruit | 4 p per 50 g |
| Bach Market | 85 pence per kg |

You can assume that the mass of a banana in each of the stores is 100 g .
Sid needs to buy 24 bananas.
Calculate how much Sid would pay in each of the stores. In which store will he be able to get 24 bananas for the least amount of money? You must show all your working.

6.

The skeleton of a dinosaur was found in Wyoming, USA, in 2008.
This skeleton is now on display in a shopping mall in Dubai.
Here are some facts about this skeleton.

- It was transported 7500 miles from Wyoming to Dubai.
- It is over 155 million years old.
- It is 80 feet long and 25 feet tall.
(a) How far was the skeleton transported?

Give your answer in kilometres.
km
(b)

Remember:

$$
1 \text { foot }(\mathrm{ft}) \approx 30 \mathrm{~cm}
$$

Calculate how long and how tall the skeleton is in metres.

$15.5 \times 10^{7}$
$1.55 \times 10^{4}$
$1.55 \times 10^{6}$
$155 \times 10^{6}$
$1.55 \times 10^{8}$
7. (a) Penystrad is a mountain village. The daily rainfall for April 2021 is given in the table below.

| Daily rainfall, $r(\mathrm{~mm})$ | Number of days |
| :---: | :---: |
| $0 \leqslant r<6$ | 15 |
| $6 \leqslant r<12$ | 11 |
| $12 \leqslant r<18$ | 3 |
| $18 \leqslant r<24$ | 1 |

(i) Wesley asks,

During April 2021, on how many days did it not rain in Penystrad?

Explain why it is not possible to answer Wesley's question using the table shown above.
(ii) Calculate an estimate for the mean daily rainfall for the 30 days of April.
$\qquad$
$\qquad$

$\qquad$
(b) Glanwen is a different village.

During the first 25 days of April in Glanwen, the mean daily rainfall was 4.4 mm .
It did not rain in Glanwen during the last 5 days of April.
Calculate the mean daily rainfall in Glanwen for April.
Give your answer correct to 3 significant figures.
8. Sara makes and sells handmade chocolates.
(a) She makes boxes for her chocolates in the shape of a tetrahedron. Sara uses thin card to make each box.
The length of each edge of the box is 5 cm .
What is the total length of the edges of one box?
Circle your answer.
$\begin{array}{lll}15 \mathrm{~cm} & 30 \mathrm{~cm} & 40 \mathrm{~cm} \quad 45 \mathrm{~cm} \quad 60 \mathrm{~cm}\end{array}$
(b) Each box contains 4 chocolates.

Each chocolate costs Sara 7p to make.
She can make 25 boxes from thin card for 50p.
Sara makes just enough chocolates and boxes to sell 150 boxes of chocolates.
Sara makes $20 \%$ profit from selling all 150 boxes of chocolates.
How much profit does Sara make?
You must show all your working.
9. A fast food restaurant has staff name badges in the shape of a star.

Examiner

Each badge has a pin across the back, as shown in the diagram.
Members of staff choose the size of badge they want to wear.
The badges are mathematically similar.

The length of the pin on the larger badge is 3.9 cm .
Calculate the height of the larger badge and the length of the pin on the smaller badge.
$\qquad$
$\qquad$
$\qquad$

Height of the larger badge cm

Length of the pin on the smaller badge cm
10. Bethan works as an office manager at a medical centre.

Last Monday, 60 patients each had an appointment with a doctor.
Bethan recorded how long each patient's appointment lasted. Her results are given in the table below.

| Length of time, <br> $t$ (minutes) | $0<t \leqslant 4$ | $4<t \leqslant 8$ | $8<t \leqslant 12$ | $12<t \leqslant 16$ | $16<t \leqslant 20$ | $20<t \leqslant 24$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of <br> patients | 4 | 24 | 18 | 6 | 2 | 6 |

(a) Complete the following cumulative frequency table.

| Time, <br> $t$ (minutes) | $t \leqslant 0$ | $t \leqslant 4$ | $t \leqslant 8$ | $t \leqslant 12$ | $t \leqslant 16$ | $t \leqslant 20$ | $t \leqslant 24$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Cumulative <br> frequency | 0 | 4 | 28 |  |  |  | 60 |

(b) On the graph paper below, draw a cumulative frequency diagram to show this information.

## Cumulative frequency
