# Monday 18 October 2021 - Morning <br> A Level Chemistry B (Salters) <br> H433/03 Practical skills in chemistry <br> <br> Practical Insert <br> <br> Practical Insert <br> Time allowed: 1 hour 30 minutes 

## INSTRUCTIONS

- Do not send this Insert for marking. Keep it in the centre or recycle it.

INFORMATION

- This document has 4 pages.

## pH changes of solutions

A group of students record the pH of some solutions using a pH meter.
They then see what happens to the pH when they add water, acid and alkali to the solutions.

## Requirements

The students are provided with the following, along with standard laboratory apparatus:

- stock solutions of the following:
- propanoic acid $0.50 \mathrm{moldm}^{-3}$
- sodium propanoate $0.50 \mathrm{moldm}^{-3}$
- sodium hydroxide $0.050 \mathrm{~mol} \mathrm{dm}^{-3}$
- hydrochloric acid $0.050 \mathrm{moldm}^{-3}$.
- solid sodium propanoate
- distilled water
- pH meter
- electronic balance
- $100 \mathrm{~cm}^{3}$ beakers.

## Method

Set up three beakers, each containing $30 \mathrm{~cm}^{3}$ of one of the solutions $\mathbf{A}, \mathbf{B}$ and $\mathbf{C}$ shown below.
A $0.50 \mathrm{moldm}^{-3}$ propanoic acid solution, $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{COOH}(\mathrm{aq})$
B $\quad 0.50 \mathrm{moldm}^{-3}$ sodium propanoate solution, $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{COONa}(\mathrm{aq})$
C $0.50 \mathrm{~mol} \mathrm{dm}^{-3}$ propanoic acid solution with 2.4 g of sodium propanoate dissolved in it.

- Gently place the pH meter into each solution in turn to measure the starting pH . Wash the pH meter with distilled water each time before placing it in the different solutions.
- Record the pH of each solution on addition of $20 \mathrm{~cm}^{3}$ of water.
- Take $30 \mathrm{~cm}^{3}$ of solution $\mathbf{A}$ and add $20 \mathrm{~cm}^{3}$ of $0.050 \mathrm{moldm}^{-3}$ hydrochloric acid. Measure the pH .
- Take $30 \mathrm{~cm}^{3}$ of solution $\mathbf{A}$ and add $20 \mathrm{~cm}^{3}$ of $0.050 \mathrm{moldm}^{-3}$ sodium hydroxide. Measure the pH .
- Repeat the last two bullet points for solutions B and C.
- Record your results in the table.

The students' results are shown in the table on the next page.

## Results table

|  | Starting pH | pH after the addition of water, acid or alkali |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Solution (volume used $-30 \mathrm{~cm}^{3}$ ) |  | $\begin{aligned} & +20 \mathrm{~cm}^{3} \\ & \text { water } \end{aligned}$ | $\begin{gathered} +20 \mathrm{~cm}^{3} \\ 0.050 \mathrm{~mol} \mathrm{dm}^{-3} \\ \mathrm{HCl}(\mathrm{aq}) \end{gathered}$ | $\begin{gathered} +20 \mathrm{~cm}^{3} \\ 0.050 \mathrm{~mol} \mathrm{dm}^{-3} \\ \mathrm{NaOH}(\mathrm{aq}) \end{gathered}$ |
| A $0.50 \mathrm{moldm}^{-3}$ propanoic acid solution, $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{COOH}(\mathrm{aq})$ | 2.5 | 2.7 | 1.7 | 3.7 |
| B $\quad 0.50 \mathrm{moldm}^{-3}$ sodium propanoate solution, $\mathrm{C}_{2} \mathrm{H}_{5} \mathrm{COONa}(\mathrm{aq})$ | 9.3 | 9.2 | 6.0 | 12.5 |
| C $\quad 0.50 \mathrm{~mol} \mathrm{dm}^{-3}$ solution of propanoic acid with 2.4 g of sodium propanoate dissolved in it. | 5.1 | 5.1 | 5.1 | 5.2 |
