Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

## Annotations and abbreviations

| Annotation in RM assessor | Meaning |
| :--- | :--- |
| $\checkmark$ and $\boldsymbol{x}$ |  |
| BOD | Benefit of doubt |
| FT | Follow through |
| ISW | Ignore subsequent working |
| M0, M1 | Method mark awarded 0, 1 |
| A0, A1 | Accuracy mark awarded 0, 1 |
| B0, B1 | Independent mark awarded 0, 1 |
| SC | Special case |
| $\wedge$ | Omission sign |
| MR | Misread |
| BP | Blank Page |
| Seen |  |
| Highlighting |  |
|  | Meaning |
| Other abbreviations <br> mark scheme |  |
| dep* | Mark dependent on a previous mark, indicated by *. The * may be omitted if only one previous M mark |
| cao | Correct answer only |
| oe | Or equivalent |
| rot | Rounded or truncated |
| soi | Seen or implied |
| www | Without wrong working |
| AG | Answer given |
| a wrt | Anything which rounds to |
| BC | By Calculator |
| DR | This question included the instruction: In this question you must show detailed reasoning. |

| Question |  |  | Answer | Marks | AO | Guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | (a) |  | $y=52.7+0.251 x$ | $\begin{gathered} \hline \text { B1* } \\ \text { B1* } \\ \text { depB1 } \\ {[3]} \\ \hline \end{gathered}$ | $\begin{aligned} & \hline 1.1 \\ & 1.1 \\ & 1.1 \end{aligned}$ | $a$ in range [0.250, 0.251] <br> $b$ correct to 3 SF <br> Completely correct including letters <br> SC: Correct formulae used for $a$ and $b$ | $\mathrm{M} 1(\mathrm{~A} 1) \mathrm{A} 1$ |
| 1 | (b) |  | This quantity is minimised to find best-fit line | $\begin{aligned} & \text { B1 } \\ & {[1]} \end{aligned}$ | 2.4 | Need "minimised" or "this is its minim | um value" OE |
| 1 | (c) |  | $\begin{aligned} & y^{\prime}=11.5+0.139 x \\ & {\left[y^{\prime}=\frac{5}{9} \times(\text { their } a-32)+\frac{5}{9} \times \text { their } b\right]} \end{aligned}$ | M1 <br> A1ft <br> [2] | $\begin{aligned} & 1.1 \\ & 1.1 \end{aligned}$ | Apply inverse formula at least once All correct, any letters, ft on their $y$ |  |
| 2 |  |  | $\begin{aligned} \mathrm{E}(D)= & 2 \times 0.1+4 \times 0.3+6 \times 0.2 \\ & =2.6 \end{aligned}$ $\left.\begin{array}{l} \mathrm{E}\left(D^{2}\right)=2^{2} \times 0.1+4^{2} \times 0.3+6^{2} \times 0.2 \\ \operatorname{Var}(D)=12.4-2.6^{2} \\ \quad=5.64 \\ \operatorname{Var}(3 D \end{array}\right)$ | $\begin{gathered} \hline \text { M1 } \\ \text { A1 } \\ \text { M1 } \\ \text { M1 } \\ \text { A1 } \\ \text { M1 } \\ \text { A1 } \\ {[7]} \end{gathered}$ | $\begin{gathered} \hline 2.1 \\ 1.1 \\ \\ 1.1 \\ 1.1 \\ 1.1 \\ 3.1 \mathrm{a} \\ 3.4 \end{gathered}$ | $\mathrm{NB}: a$ is not needed by this method <br> Or $\Sigma(x-\mu)^{2} p(x)$ <br> $\Sigma p^{2} d$ oe gets max M1A1M0M1M1 <br> Allow even if their $\operatorname{Var}(D)<0$ <br> SC: $\Sigma(x-\mu)^{2} p(x):$ M1A1, $a=0.4 \mathrm{M} 1$ <br> M1 (use this formula), A1M1A1 | Or change $0,2,4,6$ to 4, 10, 16, 22 and find $a$ |
| 3 | (a) | (i) | $\begin{array}{r} \mathrm{P}(X \geq 5)-\mathrm{P}(X \geq 11)=0.7^{4}-0.7^{10} \\ \\ =0.212 \end{array}$ | $\begin{aligned} & \hline \text { M1 } \\ & \text { A1 } \\ & {[2]} \\ & \hline \end{aligned}$ | $\begin{gathered} \hline 3.1 \mathrm{~b} \\ 3.4 \end{gathered}$ | Allow 1 term wrong at either end awrt 0.212 | Or $p q^{4}+\ldots+p q^{9}$ |
|  |  | (ii) | $\begin{aligned} & 0.7^{n-1}<1 / 3 \text {, or } 0.103>0.1>0.072 \\ & n_{\min }=5 \end{aligned}$ | $\begin{aligned} & \hline \text { M1 } \\ & \text { A1 } \\ & {[2]} \\ & \hline \end{aligned}$ | $\begin{aligned} & 2.1 \\ & 1.1 \end{aligned}$ | Solve $0.3 \times 0.7^{n_{-1}}=0.1$ or $<0.1$, allow 5 only <br> SC: 5 without sufficient justification: | inequality error |
| 3 | (b) |  | $\begin{aligned} & \frac{1-p}{p^{2}}=42 \Rightarrow 42 p^{2}+p-1=0 \\ & p=\frac{1}{7} \end{aligned}$ <br> Explicitly reject $p=-\frac{1}{6}$ $\mathrm{E}(X)=7$ | $\begin{gathered} \hline \text { M1 } \\ \text { A1 } \\ \text { A1 } \\ \text { A1 } \\ \text { A1 } \end{gathered}$ | $\begin{gathered} \hline 3.1 \mathrm{a} \\ 1.1 \\ 2.2 \mathrm{a} \\ 2.3 \\ 2.1 \\ \hline \end{gathered}$ | Equate correct variance formula to 42 Correct simplified quadratic equation <br> SC: if $-\frac{1}{7}$ and $\frac{1}{6}$, allow A1 for explici | $\text { y rejecting }-\frac{1}{7}$ |

| Question |  |  | Answer | Marks | AO | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | [5] |  |  |
| 4 | (a) | (i) | $\hat{\mu}=\bar{x}=16.8$ | $\begin{aligned} & \text { B1 } \\ & {[1]} \end{aligned}$ | 1.1 | Or exact equivalent |
|  |  | (ii) | $\begin{aligned} & \frac{48398}{160}-16.8^{2} \quad[=20.2475] \\ & \times \frac{160}{159} \\ & =20.3748 \ldots \end{aligned}$ | $\begin{aligned} & \text { M1 } \\ & \text { M1 } \\ & \text { A1 } \\ & \text { [3] } \\ & \hline \end{aligned}$ | $\begin{aligned} & \hline 1.1 \\ & 1.1 \\ & 1.1 \end{aligned}$ | If single formula used, full marks if correct; M0M1 if wrong but divisor 159 seen anywhere <br> Awrt 20.4, www |
| 4 | (b) |  | $\begin{gathered} \bar{x} \pm z \sqrt{\sigma^{2} / 160} \\ z=2.576 \\ (15.88,17.72) \end{gathered}$ | $\begin{aligned} & \text { M1 } \\ & \text { A1 } \\ & \text { A1 } \\ & {[3]} \end{aligned}$ | $\begin{aligned} & 3.3 \\ & 1.1 \\ & 3.4 \end{aligned}$ | Any $z$ from $\Phi^{-1}, 160$ needed, allow $\sqrt{ }$ errors <br> Or better, e.g. 2.575829 <br> Both, 4 sf required by question, www (NB: $\sigma^{2}=20.2475$ gives same end-points to 4 SF but this gets M1A1A0) |
| 4 | (c) | (i) | Not needed in (a) as $\mathrm{E}(X)$ and $\operatorname{Var}(X)$ are independent of the distribution | $\begin{aligned} & \text { B1 } \\ & {[1]} \end{aligned}$ | 2.4 | Mention at least one of $\mathrm{E}(X)$ and $\operatorname{Var}(X)$ explicitly, or "not relevant to $\bar{X}$ " |
|  |  | (ii) | Needed in (b) as parent distribution not stated to be normal | $\begin{aligned} & \hline \text { B1 } \\ & {[1]} \end{aligned}$ | 2.4 | Must make it clear that two distributions are involved. " $n$ is large" etc: B 0 |

\begin{tabular}{|c|c|c|c|c|c|}
\hline \multicolumn{2}{|r|}{Question} \& Answer \& Marks \& AO \& Guidance \\
\hline 5 \& (a) \& \begin{tabular}{l}
The value of Pearson's pmcc would be changed by (most) such changes. \\
The value of Spearman's \(r_{s}\) would not be changed as the ranks remain unchanged.
\end{tabular} \& \begin{tabular}{l}
B1 \\
