## GCSE <br> COMBINED SCIENCE: TRILOGY

Higher Tier
Chemistry Paper 2H
Time allowed: 1 hour 15 minutes

## Materials

For this paper you must have:

- a ruler
- a scientific calculator
- the periodic table (enclosed).

## Instructions

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).

- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

| $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{3}$ Why was the green colour still on the start line at the end of the experiment? |
| :--- | :--- | :--- | :--- |

Tick $(\checkmark)$ one box.

The experiment was left for too long.

The green colour was insoluble in the solvent.

The green spot contained too many colours.

The green spot was too small.

Question 3 continues on the next page

A teacher demonstrated the reaction between sodium thiosulfate solution and hydrochloric acid.

Figure 3 shows the experiment.
The experiment was done in a fume cupboard.

Figure 3

This is the method the teacher used.

1. Pour $50 \mathrm{~cm}^{3}$ of sodium thiosulfate solution into a conical flask.
2. Put the conical flask on a black cross drawn on a piece of paper.
3. Pour $10 \mathrm{~cm}^{3}$ of hydrochloric acid into the conical flask and start a timer.
4. Stop the timer when the cross can no longer be seen.
5. Repeat the experiment at different temperatures.
