# GCSE COMBINED SCIENCE: SYNERGY

Foundation Tier

Paper 1 Life and environmental sciences

Tuesday 15 May 2018 Afternoon Time allowed: 1 hour 45 minutes

#### **Materials**

For this paper you must have:

- a ruler
- a scientific calculator
- the periodic table (enclosed)
- the Physics Equations Sheet (enclosed).

#### Instructions

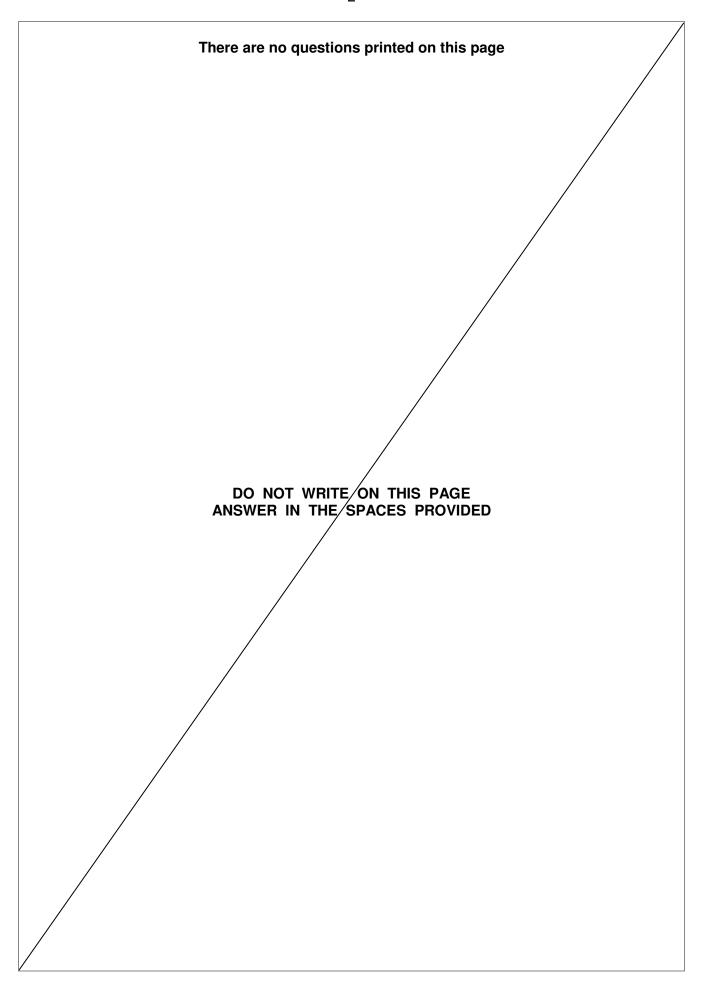

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

#### Information

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

## Turn over for the next question

This question is about gases in the air.	
Figure 3 represents a molecule found in air.	
Figure 3 O=C=O	
What is the formula of the molecule shown in <b>Figure 3</b> ?  [1 market one box.	k]
Co2	
2CO	
CO <sub>2</sub>	
CO <sup>2</sup>	
What is the name of the molecule shown in Figure 3?	
You may use the periodic table to help you.  [1 market	k]
	Figure 3  Figure 3  O=C=O  What is the formula of the molecule shown in Figure 3?  Tick one box.  Co2  CO2  CO2  What is the name of the molecule shown in Figure 3?

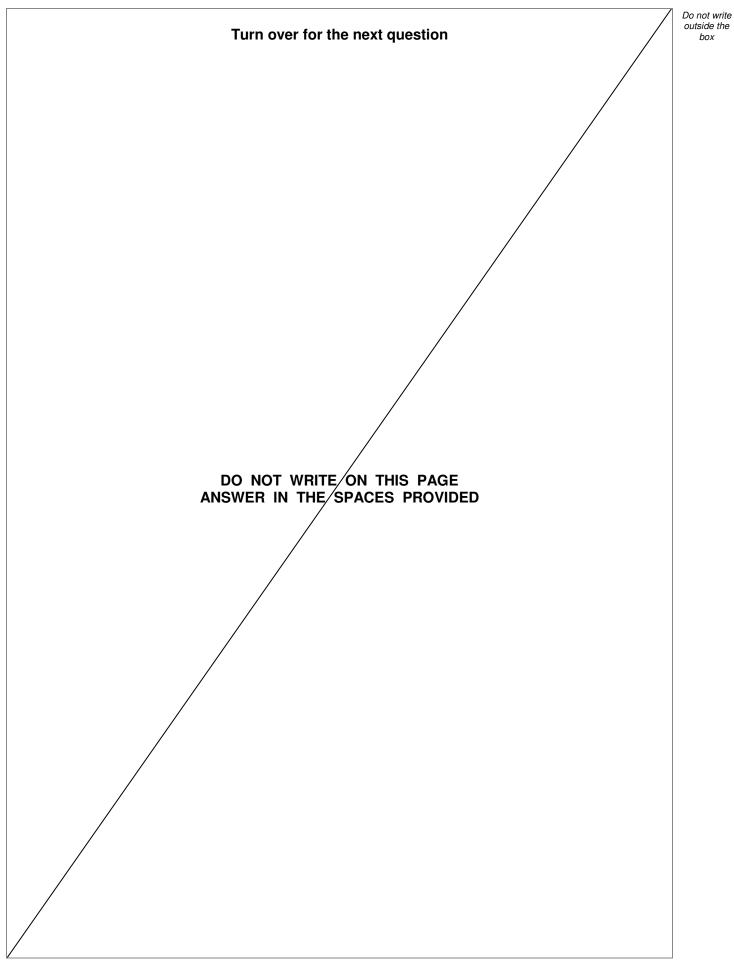

0 3.3	The percentage of oxygen in air is 21%.	
	The mass of air in a classroom was 220 kg	
	Calculate the mass of oxygen in the classroom.	[1 mark]
	Mass of oxygen =	kg
	Carbon monoxide is an air pollutant.	
0 3.4	Describe how carbon monoxide is produced from fuels.	[2 marks]
0 3.5	Carbon monoxide can decrease the concentration of oxygen in the blood.  Which part of the blood would be most affected by carbon monoxide?  Tick <b>one</b> box.	[1 mark]
	Red blood cells  Plasma  Platelets	
	White blood cells	

0 3.6	What <b>two</b> effects could a decreased concentration of oxygen in the blood have on body cells?		
		[2 marks]	
	Tick <b>two</b> boxes.		
	Cell death		
	Decreased respiration rate		
	Faster cell division		
	Faster cell growth		
	More energy released		
0 3.7	Some air pollutants cause acid rain.		
	Give <b>one</b> problem caused by acid rain.	[1 mark]	
			9

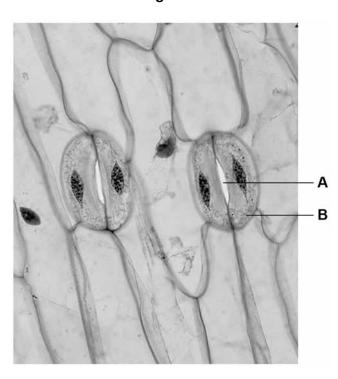

**0 4 Figure 4** shows the lower surface of a leaf magnified 800 times.

Figure 4

0 4 . 1 Name hole A in the leaf surface.

[1 mark]

0 4 . 2 Name cell B.

[1 mark]

13 0 4 . 3 Cell **B** can lose or gain water. Complete the sentences. Choose answers from the box. [2 marks] active transport condensation osmosis photosynthesis transpiration Cell **B** can gain water by \_\_\_\_\_\_. Water vapour can escape from the leaf through hole A Which factors increase the rate of water loss from hole **A**? [2 marks] Tick **two** boxes. Increasing acidity Increasing nitrogen concentration Increasing oxygen concentration Increasing temperature Increasing wind speed 0 4 . Give **one** reason why the movement of water in a plant is important. [1 mark]

Question 4 continues on the next page

outside the

0 4.6	The African Baobab tree has no leaves for up to 9 months of the year.	Do r outs
	Suggest how this helps the tree to survive in an area where there is not much rain.  [1 mark]	<b>k</b> ]
		_
		_
0 4.7	Figure 4 on page 12 is a photograph taken through a microscope.	
	The image is magnified 800 times.	
	One of the cells in the image has a width of 12 mm	
	Calculate the real width of this cell in micrometres.	
	Complete the following steps. [3 marks	s]
	Use the equation to work out the real width of the cell in millimetres.	
	real width of object = $\frac{\text{width of image}}{\text{magnification}}$	
	Real width of cell = millimetre	<b>)</b> S
	Convert the real width of the cell from millimetres to micrometres.	
	1 millimetre = 1000 micrometres.	
	Real width of cell = micrometre	es

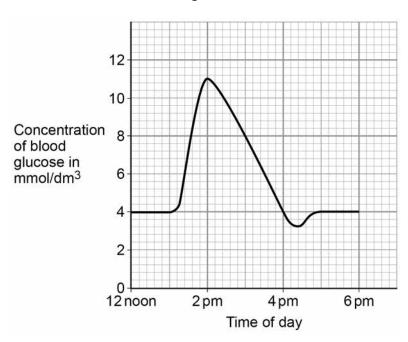

0 5	The concentration of glucose in the blood is controlled by homeostasis.		Do not write outside the box
0 5.1	Give <b>one</b> other example of an internal condition controlled by homeostasis.	[1 mark]	
	Question 5 continues on the next page		

**Figure 5** shows the change in glucose concentration in the blood of a person with Type 1 diabetes.

Figure 5

0 5.2	Calculate the increase in blood glucose concentration between 1 pm	and 2 pm. [1 mark]
	Increase in blood glucose =	mmol/dm <sup>3</sup>

0 5. 3 Suggest at what time the person ate lunch.

Use Figure 5. [1 mark]

Name the hormone the person injected that caused the blood glucose concentration to decrease.

Do not write outside the box

0 5.5	Explain th	ne decrease in b	olood glucose co	oncentration after	the hormone was	s injected.
	Use all th	e words in the b	oox in your expla	anation.		[2 marks]
		blood	cells	glucose	glycogen	
0 5 . 6	Normal bl	lood glucose co	ncentration is a	pproximately 4 mi	mol/dm <sup>3</sup>	
	What cou at 4 pm?	ld be the reason	n for the blood g	llucose concentra	tion falling below	
	Tick one	box.				[1 mark]

# **0 6 Figure 6** shows a food web.

0 6.1	What name is given to all the organisms together in an ecosystem?  Tick one box.  Community  Environment  Habitat	[1 mark]
0 6.2	Give the name of <b>one</b> secondary consumer shown in <b>Figure 6</b> .	[1 mark]
0 6.3	Algae can photosynthesise.  Which word describes the algae in this food web?  Tick one box.  Consumer  Predator  Prey  Producer	[1 mark]
	Question 6 continues on the next page	

Do not write outside the box

<u></u>		
Explain why most algae are found near the surface of the sea, and not at greater depths.	[2 marks]	Do no outsio
Toothed whales will compete with each other for food.		
Suggest what else toothed whales might compete for.	[1 mark]	
Look at <b>Figure 6</b> on page 20.		
The population of leopard seals decreases if there are fewer elephant seals		
Explain why.	[2 marks]	
		8
	Toothed whales will compete with each other for food.  Suggest what else toothed whales might compete for.  Look at <b>Figure 6</b> on page 20.  The population of leopard seals decreases if there are fewer elephant seals	Toothed whales will compete with each other for food.  Suggest what else toothed whales might compete for.  [1 mark]  Look at Figure 6 on page 20.  The population of leopard seals decreases if there are fewer elephant seals.  Explain why.

0 7	Gamma radiation is emitted from the nuclei of some atoms.
0 7.1	What is a gamma ray?  [1 mark]  Tick one box.
	A helium nucleus
	A high speed electron
	A neutron
	A type of electromagnetic radiation
0 7.2	Which would be the best absorber of gamma radiation?  [1 mark]
	Tick <b>one</b> box.
	A few mm of air
	A thick sheet of cardboard
	A thick sheet of lead
	A thin sheet of paper
	Question 7 continues on the next page

Do not write outside the box

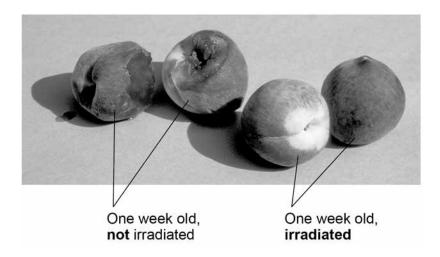

Food can be irradiated with gamma rays to kill bacteria.

Figure 7 shows a photograph of peaches.

Two of the peaches were irradiated.

The photograph was taken one week after irradiation.

Figure 7

0 7.3	Why do food producers need to kill bacteria on Tick <b>two</b> boxes.	food? [2 marks]	]
	To change the colour of the food		
	To decrease the rate of decay of the food		
	To decrease the shelf life of the food		
	To prevent food poisoning		
	To remove dirt from food		

0 7.4	How do gamma rays kill bacteria?  Tick <b>one</b> box.	[1 mark]	Do not wri outside th box
	Gamma rays cause meiosis to occur		
	Gamma rays cause mutations		
	Gamma rays decrease the size of bacterial cells		
	Gamma rays destroy the food source for bacteria		
0 7.5	Food producers can irradiate food by passing it close to a radioactive source.  How can food producers increase the level of radiation that the food is exported to the control of the con		
	Boil the food before passing it close to the radioactive source		
	Decrease the distance between the food and the radioactive source		
	Increase the time for which the food is close to the radioactive source		
	Put the radioactive source in a box		
	Reduce the temperature of the radioactive source		
0 7.6	A student said:		
	'The irradiated food would become radioactive.'		
	Give <b>one</b> reason why the student is <b>not</b> correct.	[1 mark]	
			8
			لـنَّــا ا

		Do not write
0 8	Some students tested a red cabbage leaf for starch.	outside the box
	This is the method used.	
	Boil the leaf in ethanol.	
	2. Rinse the leaf in water.	
	3. Add the reagent to test the leaf for starch.	
0 8.1	Give <b>one</b> safety precaution the students should take in this test.  [1 mark]	
	Which reagent is used to test the bailed loof for storch?	
0 8 . 2	Which reagent is used to test the boiled leaf for starch?  [1 mark]	
	Tick <b>one</b> box.	
	Benedict's solution	
	Biuret solution	
	lodine solution	
	Sodium chloride solution	

Do not write outside the box

0 8.3	What colour will be seen if the test for starch is positive?  [1 mark]	
	Tick <b>one</b> box.	
	Blue-black	
	Pale pink	
	Orange	
	Red	
	The students then used paper chromatography to investigate the coloured pigments in a red cabbage leaf.	
0 8.4	Complete the sentences.	
	Choose answers from the box. [2 marks]	
	[Z Illaiks]	
	distil evaporate filter mobile separate solid	
	Chromatography can be used to mixtures.	
	In paper chromatography, the paper is part of the stationary phase.	
	The solvent is called the phase.	
	Question 8 continues on the next page	

Table 2 shows the students' results.

The distance each pigment moved was measured from the start line.

Table 2

	Distance moved in mm	R <sub>f</sub> value
Yellow-green pigment	17	X
Yellow pigment	46	0.42
Orange pigment	100	0.91

The R<sub>f</sub> value is calculated using the equation:

0 8 . 5	The solvent moved 110 mm from the start line.
	Calculate R <sub>f</sub> value <b>X</b> in <b>Table 2</b> .
	Give your answer to 2 significant figures.  [2 marks]
	R <sub>f</sub> value <b>X</b> =

Do not write outside the box

0	8 .	6	The known ranges of R <sub>f</sub> values of some pigments are shown in <b>Table 3</b> .
_	· • .		

Table 3

Pigment	R <sub>f</sub> value range	
Carotene	0.89 to 0.98	
Chlorophyll a	0.24 to 0.30	
Chlorophyll b	0.20 to 0.26	
Xanthophyll	0.04 to 0.28	

The R <sub>f</sub> value for the orange pigment in red cabbage leaves is 0.91					
What is this orange p	igment most likely to be?	[1 mark]			
Tick <b>one</b> box.		[· · · · · · · · · · · · · · · · · · ·			
Carotene

Do not write outside the box

1 0 A student investigated how the temperature of a metal block changed with time.

An electric heater was used to increase the temperature of the block.

The heater was placed in a hole drilled in the block as shown in **Figure 9**.

Figure 9

Question 10 continues on the next page

The student measured the temperature of the metal block every 60 seconds. **Table 5** shows the student's results.

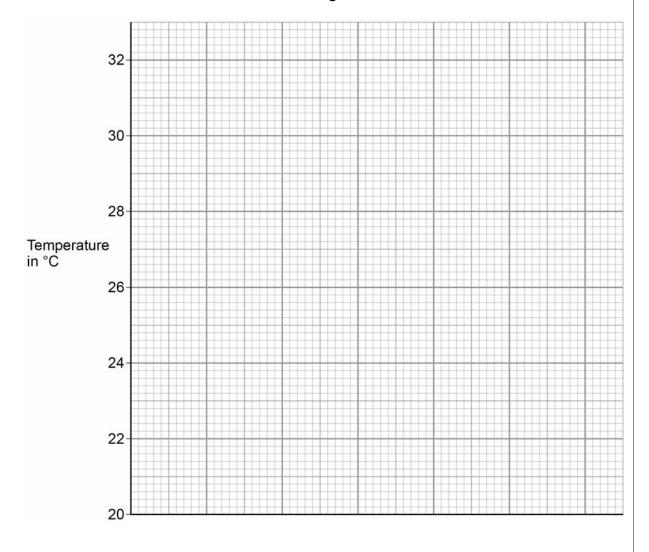

Table 5

Time in s	Temperature in °C
0	20.0
60	24.5
120	29.0
180	31.0
240	31.5

- 1 0 . 1 Complete the graph of the data from Table 5 on Figure 10.
  - Choose a suitable scale for the x-axis.
  - Label the x-axis.
  - Plot the student's results.
  - Draw a line of best fit.

[4 marks]

Figure 10

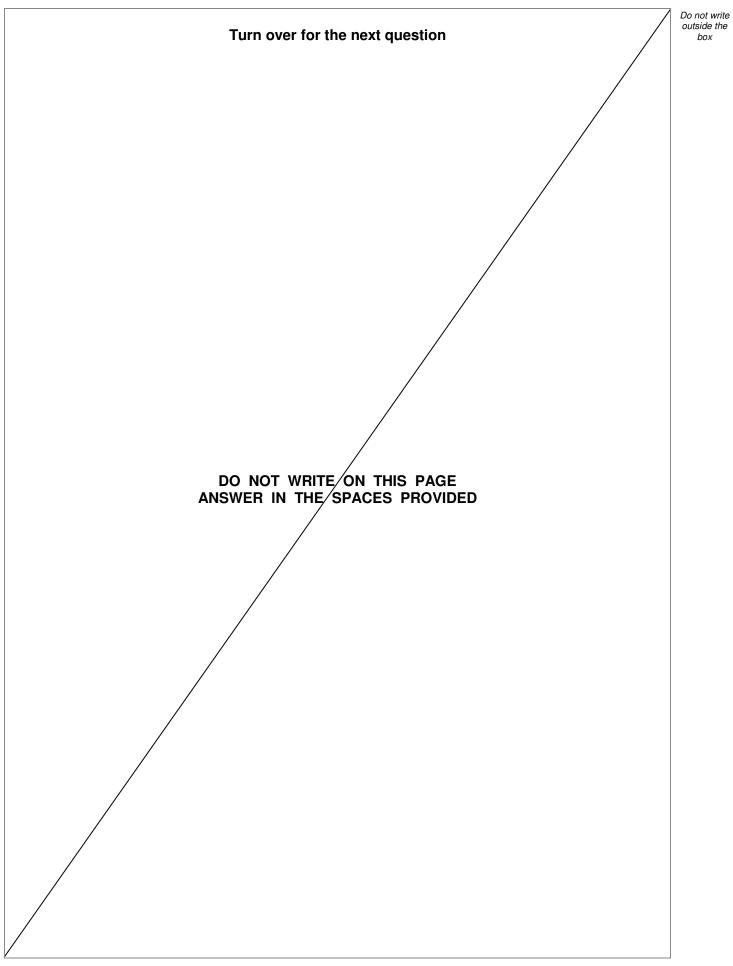

1 0 . 2	The rate of change of temperature of the block is given by the gradient of the graph.		
	Determine the gradient of the graph over the first 60 seconds.	[2 marks]	
	Gradient =		
	The motel block had a mass of 1 50 kg		
1 0 . 3	The metal block had a mass of 1.50 kg		
	The specific heat capacity of the metal was 900 J/kg °C		
	Calculate the change in thermal energy of the metal during 240 seconds.		
	Use the Physics Equations Sheet.		
	Give your answer in kilojoules.	[4 marks]	
	Change in thermal energy =	kJ	
	Question 10 continues on the next page
