General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Evaluation: 2 marks for two evaluative comments,
OR 2 marks for identification and linked development of
one evaluative comment e.g.

- Depends upon the degree of price elasticity of demand when supply shifts (1)
- Depends upon the degree of price elasticity of supply when demand shifts (1)
- Use of buffer stocks (1) brings price stability (1)
- Transitory changes (1) short-term shocks of disappear over-time (1)
- Futures market (1) dampens price instability/removes volatility (1)
- Easy to store (1) and therefore to release if there was a poor harvest (1)
- Short-run/long-run (1)

NB award a maximum of 6/8 if no reference to Fig 2 and/or price elasticity

Level	Mark	Descriptor	
	0	A completely inaccurate response.	
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no link between causes and consequences.	
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.	
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Evaluation

Case against

- X-inefficiency –organisational slack due to managerial complacency as a result of lower competition
- Allocative inefficiency –monopoly power that makes them price makers and allows them to charge higher prices (less welfare max)
- Productive inefficiency – profit maximising,
- Dynamic inefficiency might not reinvest but give profits to shareholders in the firm on higher dividends, principal agent problem
- Degree of monopoly power – ability of consumers to switch to alternatives
- Government intervention – price caps, tax
- Government intervention damages efficiency, regulatory capture, strength of regulator

Diagram e.g.

Monopoly price P_1 is not productively efficient as output is at point a and not the lowest point on the AC curve, b.
Monopoly price P_1 is not allocatively efficient as the price is not equal to MC (c) resulting in a dead weight welfare loss.

NB Monopoly not operating efficiently can be seen as KAA and efficiently as evaluation or vice versa. Diagram not required.

Knowledge, application and analysis		
Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–4	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	5–8	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two stage chains of reasoning only.
Level 3	9–12	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	13–16	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.
